Subjectivity, Language and the Postcolonial Hannah Botsis, 2017-11-10 In *Subjectivity Language and the Postcolonial* Hannah Botsis draws on theoretical work that exists at the intersection of critical social psychology sociolinguistics and the political economy of language to examine the relationships between language subjectivity materiality and political context The book foregrounds the ways in which the work of Bourdieu could be read in conjunction with poststructural theorists such as Butler and Derrida to offer a critical understanding of subjectivity language and power in postcolonial contexts This critical engagement with theorists traditionally from outside of psychology allows for a situated approach to understanding the embodied and symbolic possibilities and constraints for the postcolonial subject This exploration opens up how micro politics of power are refracted through ideological categories such as language race and class in post apartheid South Africa Also drawing on the empirical findings of original research undertaken in the South African context on students linguistic biographies the book offers a unique perspective critical social theory is brought to bear on the empirical linguistic biographies of postcolonial subjects offering insight into how power is negotiated in the postcolonial symbolic economy Ideal for advanced undergraduate and postgraduate students on courses including social psychology sociolinguistics sociology politics and education this is an invaluable resource for students and researchers alike *Improving Primary Mathematics Education, Teaching and Learning* Mellony Graven, Hamsa Venkat, 2017-01-19 This book focuses on how to improve the teaching and learning of primary level mathematics education within resource constrained contexts It builds on two large numeracy projects within South Africa which speak to broader global concerns and highlight how research and development not only enables one to meet ethical imperatives but also explore how further interventions can be developed Teacher and research communities must work together to create mutually beneficial relationships and establish a cohesive understanding of the requirements of primary mathematics education **The Standardisation of African Languages**, 2008

Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on

basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI
