Taken For A Ride Matteo Rizzo, 2017-05-19 How does public transport work in an African city under neoliberalism Who owns what in it Who has the power to influence its shape and changes in it over time What does it mean to be a precarious and informal worker in the private minibuses that provide public transport in Dar es Salaam These are the main questions that inform this in depth case study of Dar es Salaam's public transport system over more than forty years The growth of cities and informal economies are two central manifestations of globalization in the developing world Taken for a Ride addresses both drawing on long term fieldwork in Dar es Salaam Tanzania and charting its public transport system's journey from public to private provision This new addition to the Critical Frontiers of Theory Research and Practice in International Development Studies series investigates this shift alongside the increasing deregulation of the sector and the resulting chaotic modality of public transport It reviews state attempts to regain control over public transport and documents how informal wage relations prevailed in the sector The changing political attitude of workers towards employers and the state is investigated from an initial incapacity to respond to exploitation to the political organisation and unionisation which won workers concessions on labour rights A longitudinal study of workers throws light on patterns of occupational mobility in the sector and the political and economic interests that shaped the introduction of Bus Rapid Transit in Dar es Salaam and local resistance to it are analysed Taken for a Ride reveals the political economy of public transport exposing the limitations of market fundamentalist and post colonial scholarship on economic informality the urban experience in developing countries and the failure to locate the agency of the urban poor within their economic and political structures It is both a contribution and a call for the contextualised study of actually existing neoliberalism *Money, Markets, and Monarchies* Adam Hanieh, 2018-09-13 Framed by a critical analysis of global capitalism this book examines how the six states of the Gulf Cooperation Council are powerfully shaping the political economy of the wider Middle East Through unprecedented and fine grained empirical research encompassing sectors such as agribusiness real estate finance retail telecommunications and urban utilities Adam Hanieh lays out the pivotal role of the Gulf in the affairs of other Arab states This vital but little recognised feature of the Middle East's political economy is essential to understanding contemporary regional dynamics not least of which is the emergence of significant internal tensions within the Gulf itself Bringing fresh insights and a novel interdisciplinary approach to debates across political economy critical geography and Middle East studies this book fills an important gap in how we understand the region and its place in the global order Raced Markets Lisa Tilley, Robbie Shilliam, 2021-05-30 Despite rich archives of work on race and the global economy most notably by scholars of colour and Global South intellectuals the discipline of Political Economy has largely avoided an honest confrontation with how race works within the domains it studies not least within markets By way of corrective this book draws together scholarship on the material function of race at various scales in the global political economy The collective provocation of the contributors to

this volume is that race has been integral to the formation of capitalism as extensively laid out by the racial capitalism literature and takes on new forms in the novel market spaces of neoliberalism The chapters within this volume also reinforce that the current political conjuncture marked by the ascension of neo fascist power cannot be defined by an exceptional intrusion of racism nor can its racism be dismissed as epiphenomenal Raced Markets will be of great value to scholars students and researchers interested in political economy and racial capitalism as well as those willing to explore how race takes on new forms in the novel market spaces of contemporary neoliberalism The chapters in this book were originally published as a special issue of the New Political Economy

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics

Energy and Water Development Appropriations for 2014 United States. Congress. House. Committee on Appropriations. Subcommittee on Energy and Water Development, 2013

Class in the New Millennium Will Atkinson, 2017-02-17 Class in the New Millennium paints a fresh and comprehensive picture of social class in Britain today Anchored in a broad repertoire of methods and pursuing a distinctive theoretical agenda it not only painstakingly maps the structure transformation and effects of the UK s key fault lines but goes behind closed doors to see how they play out in everyday family life Throughout the book Atkinson throws new light on a diverse array of themes including the continued effects of deindustrialisation educational expansion feminisation of the workforce and surging employment insecurity the persistence of lifestyle cleavages despite cultural and technological change the growth of political disengagement the transformation of the Labour Party and the rise of nationalism the entwinement of class with space place and physical movement and the way in which class interacts with intimate relations to shape not just the way we decorate our walls or talk

over the dining table but the very reproduction of the class structure itself This innovative title will appeal to scholars as well as advanced undergraduate and postgraduate students interested in the fields of sociology politics and political science cultural studies cultural geography social policy and social work

Sold Out Michelle Malkin,John Miano,2015-11-10 The 1 New York Times bestselling author and firebrand syndicated columnist Michelle Malkin sets her sights on the corrupt businessmen politicians and lobbyists flooding our borders and selling out America s best and brightest workers In Sold Out Michelle Malkin and John Miano name names and expose the lies of those who pretend to champion the middle class while aiding and abetting massive layoffs of highly skilled American workers in favor of cheap foreign labor Malkin and Miano will explode some of the most commonly told myths spread in the media like these Lie 1 America is suffering from an apocalyptic

shortage of science technology engineering and math workers Lie 2 US companies cannot function without an unlimited injection of the highly skilled and highly educated foreign workers who offer capital and energy that American workers can't match Lie 3 America's best and brightest talents are protected because employers are required to demonstrate that they've made every effort to hire American citizens before resorting to foreign labor For too long open borders tech billionaires and their political enablers have escaped tough public scrutiny of their means and motives It's time to trade the whitewash for solvent American workers deserve better and the public deserves the unvarnished truth **The Geography of Injustice**

Barak Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption *The Geography of Injustice* offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history **Economic Geography** Neil M. Coe, Philip F. Kelly, Henry W. C. Yeung, 2019-12-31 A revised and updated

edition of the leading introductory text on the geography of economic life from the local to the global *Economic Geography* is an engaging and accessible introduction to the different ways modern economic geographers understand analyze and interpret economic processes This comprehensive text addresses significant questions relevant to contemporary economic life from the activities of transnational corporations to issues surrounding workplaces and consumption It encourages readers to explore how spatial patterns places networks and territories shape large scale economic processes Accessible highly illustrated material presents fresh insights from the field complemented by relatable real world examples that help students understand the social cultural and political contexts underpinning global economic processes Now in its third edition this extensively revised and updated textbook retains the features and thematic structure that have proved popular with students and instructors alike while adding exciting new content New chapters explore how the global economy and global development are institutionalized and governed the economic geographies of global climate change economic practices outside the capitalist mainstream the role of migrants in labour markets global production networks and more Introduces economic geography with a thematic approach including major concepts current debates and case studies

Revised and updated to enhance international coverage including three entirely new chapters on international development alternative economies and global climate change Substantial new content on labour migration global production networks and recent intellectual trends such as evolutionary economic geography Highly illustrated with diagrams and photographs closely integrated into the text Pedagogical aids including key case studies learning objectives text boxes chapter essay questions summaries and further reading Core geographical concepts such as place networks and territory are closely integrated into all chapters Economic Geography A Contemporary Introduction is an invaluable source of up to date knowledge for students new to the field for those requiring a solid foundation as well as for a broader academic and public readership with interest in this area of study New Directions in Elite Studies Olav Korsnes,Johan Heilbron,Johs.

Hjellbrekke,Felix Bühlmann,Mike Savage,2017-12-06 Since the financial crisis the issue of the one percent has become the centre of intense public debate unavoidable even for members of the elite themselves Moreover inquiring into elites has taken centre stage once again in both journalistic investigations and academic research New Directions in Elite Studies attempts to move the social scientific study of elites beyond economic analysis which has greatly improved our knowledge of inequality but is restricted to income and wealth In contrast this book mobilizes a broad scope of research methods to uncover the social composition of the power elite the field of power It reconstructs processes through which people gain access to positions in this particular social space examines the various forms of capital they mobilize in the process economic but also cultural and social capital and probes changes over time and variations across national contexts Bringing together the most advanced research into elites by a European and multidisciplinary group of scholars this book presents an agenda for the future study of elites It will appeal to all those interested in the study of elites inequality class power and gender inequality **Culture, Political Economy and Civilisation in a Multipolar World Order** Ray Silvius,2016-10-04 This

book seeks to understand how Russia s multifaceted rejection of American unipolarity and de territorialised neo liberal capitalism has contributed to the gestation of the present multipolar moment in the global political economy Analysing Western world order precepts via the actions of a powerful albeit precarious national political economy and state structure situated on the periphery of Western world order Silvius explores the manner in which culture and ideas are mobilised for the purposes of national regional and international political and economic projects in a post global age The book Explains and analyses the tensions of post Soviet Russia s integration into and simultaneous partial rejection of the capitalist global political economy Provides an overview of the social political and historical origins of Russian samobytnost uniqueness after the fall of the Soviet Union and demonstrates their significance to contemporary understandings of world order Explores how structures of cultural difference and practices of cultural differentiation interact with the normative legacies of American hegemonic aspirations in contemporary world order structures Evaluates how cultural and civilisational representations are mobilised for state projects and their corresponding regional and international dimensions within the global political

economy This book will be of great interest to students and scholars of Russian Foreign Policy IPE and comparative political economy

Trading Environments Gordon M. Winder, Andreas Dix, 2015-12-07 This volume examines dynamic interactions between the calculative and speculative practices of commerce and the fruitfulness variability materiality liveliness and risks of nature It does so in diverse environments caught up in new trading relationships forged on and through frontiers for agriculture forestry mining and fishing Historical resource frontiers are understood in terms of commercial knowledge systems organized as projects to transform landscapes and environments The book asks how were environments traded and with what environmental and landscape consequences How have environments been engineered standardized and transformed within past trading systems What have been the successes and failures of economic knowledge in dealing with resource production in complex environments It considers cases from northern Europe North and South America Central Africa and New Zealand in the period between 1750 and 1990 and the contributors reflect on the effects of transnational commodity chains competing economic knowledge systems environmental ignorance and learning and resource exploitation In each case they identify tensions blind spots and environmental learning that plagued commercial projects on frontiers

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

The Routledge Handbook of Henri Lefebvre, The City and Urban Society Michael E. Leary-Owhin, John P. McCarthy, 2019-11-21 The Routledge Handbook of Henri Lefebvre The City and Urban Society is the first edited book to focus on Lefebvre s urban

theories and ideas from a global perspective making use of recent theoretical and empirical developments with contributions from eminent as well as emergent global scholars The book provides international comparison of Lefebvrian research and theoretical conjecture and aims to engage with and critique Lefebvre's ideas in the context of contemporary urban social and environmental upheavals to use Lefebvre's spatial triad as a research tool as well as a point of departure for the adoption of ideas such as differential space to reassess Lefebvre's ideas in relation to nature and global environmental sustainability and to highlight how a Lefebvrian approach might assist in mobilising resistance to the excesses of globalised neoliberal urbanism The volume draws inspiration from Lefebvre's key texts *The Production of Space* *Critique of Everyday Life* and *The Urban Revolution* and includes a comprehensive introduction and concluding chapter by the editors The conclusions highlight implications in relation to increasing spatial inequalities increasing diversity of needs including those of migrants more authoritarian approaches and asymmetries of access to urban space Above all the book illustrates the continuing relevance of Lefebvre's ideas for contemporary urban issues and shows via global case studies how resistance to spatial domination by powerful interests might be achieved The Handbook helps the reader navigate the complex terrain of spatial research inspired by Lefebvre In particular the Handbook focuses on the series of struggles globally for the right to the city and the collision of debates around the urban age cityism and planetary urbanisation It will be a guide for graduate and advanced undergraduate teaching and a key reference for academics in the fields of Human Geography Sociology Political Science Applied Philosophy Planning Urban Theory and Urban Studies Practitioners and activists in the field will also find the book of relevance

Horses, Power and Place Neil Ward, 2023-12-05 *Horses Power and Place* explores the evolution of humanity's relationship with horses from early domestication through to the use of the horse as a draught animal an agricultural industrial and military asset and an animal of sport and leisure Taking an historical approach and using Britain as a case study this is the first book length exploration of the horse in the more than human geography of a nation It traces the role and implications of horse based mobility for the evolution of settlement structure urban morphology and the rural landscape It maps the growth and various uses of horses to the point of peak horse in the early twentieth century before considering the contemporary place of the horse in twenty first century economy and society It assesses the role of the horse in the formation of places within Britain and in the formation of the nation The book reflects on the implications of this historical and contemporary equine geography for animal geographies and animal studies It argues for the study of animals in general in how places are made not just by humans Written in a clear and accessible style this book will be essential reading for students and scholars of animal geography and animal studies more widely

The Tumultuous Politics of Scale Donald M. Nonini, Ida Susser, 2020-01-23 *Contemporary politics* this book contends depend upon the turbulent struggles and strategies around scale Conflicts over scale can be seen as opaque class struggles Political projects whether from the ground up or representing corporate or state interests continually contest the scale at which authority is vested This volume looks at

the way global corporations redefine the scale of power and how working class and other movements build alliances and cross scales to develop political blocs What injustices are perpetrated or more hopefully redressed in this process The book consisting of contributions from anthropologists geographers and cultural studies scholars explores theoretical issues around contested temporal and spatial scales and around variations in scale from the body to the global Part I focuses on bodies in motion entangled in battles over new boundaries and political coalitions and the ways in which migrants and refugees are disrupted by intersecting time scales Part II on the nation state addresses the shifting responsibilities assigned by law at different historical moments and the impact of global energy trade on national austerity policies Part III on rescaling sovereignty discusses the misleading media discourse on Brexit and reconstructs the class bases of the move to the Right in Eastern Europe that threaten the EU Part IV on the histories of changing scales of movements revisits historical debates on uneven and combined development and sets out the transnational labor movements of the eighteenth and nineteenth century Atlantic which prefigure contemporary struggles of labor in a world which is still one of uneven and combined capitalist development Finally Part V considers ways in which some social movements are constrained by scale while others reshape parties and traverse nations in their efforts to build class alliances and political blocs

An Endogenous Theory of Property Rights

Peter Ho, 2018-10-15 From a neo liberal neo classical paradigm secure formal and private property rights are crucial to fostering sustained development Institutions that fail to respond to shifting socio economic opportunities are thus forced to make new arrangements The enigma is posed by developments on the ground Why would the removal of authoritarian institutions during the Arab Spring or Iraq War not increase market efficiency but rather cause the reverse while China and India despite persisting insecure informal and common institutions featured sustained growth This collection posits that understanding these paradoxes requires a refocusing from form to function detached from normative assumptions about institutional appearance In so doing three things are accomplished First starting from case studies on land it is ascertained that the argument can be meaningfully extended to labour capital and beyond Second the argument validates the Credibility Thesis that is once institutions persist they fulfil a function Third the collection studies development broadly construed by including the modes of production and beyond the rural and urban the developed and developing This is why it reviews property rights from China and India to Turkey Mexico and Malaysia covering issues such as customary rights and privatization mining and pastoralism dam building and irrigation but also state owned banks trade unions and notaries This book was originally published as a special issue of The Journal of Peasant Studies
