*South African Schooling: The Enigma of Inequality* Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

**Is Russia Fascist?** Marlene Laruelle, 2021-03-15 In *Is Russia Fascist* Marlene Laruelle argues that the charge of fascism has become a strategic narrative of the current world order Vladimir Putin's regime has increasingly been accused of embracing fascism supposedly evidenced by Russia's annexation of Crimea its historical revisionism attacks on liberal democratic values and its support for far right movements in Europe But at the same time Russia has branded itself as the world's preeminent antifascist power because of its sacrifices during the Second World War while it has also emphasized how opponents to the Soviet Union in Central and Eastern Europe collaborated with Nazi Germany Laruelle closely analyzes accusations of fascism toward Russia soberly assessing both their origins and their accuracy By labeling ideological opponents as fascist regardless of their actual values

or actions geopolitical rivals are able to frame their own vision of the world and claim the moral high ground Through a detailed examination of the Russian domestic scene and the Kremlin s foreign policy rationales Laruelle disentangles the foundation for meaning and validity of accusations of fascism in and around Russia Is Russia Fascist shows that the efforts to label opponents as fascist is ultimately an attempt to determine the role of Russia in Europe s future [A Broken Social Elevator? How to Promote Social Mobility](#) OECD,2018-06-15 This report provides new evidence on social mobility in the context of increased inequalities of income and opportunities in OECD and selected emerging economies It covers the aspects of both social mobility between parents and children and of personal income mobility over the life course

Evans,Stephen McBride,2017-01-01 Bryan M Evans Stephen McBride and their contributors delve further into the more practical ground level side of the austerity equation in *Austerity The Lived Experience* Economically austerity policies cannot be seen to work in the way elite interests claim that they do Rather than soften the blow of the economic and financial crisis of 2008 for ordinary citizens policies of austerity slow growth and lead to increased inequality While political consent for such policies may have been achieved it was reached amidst significant levels of disaffection and strong opposition to the extremes of austerity The authors build their analysis in three sections looking alternatively at theoretical and ideological dimensions of the lived experience of austerity how austerity plays out in various public sector occupations and policy domains and the class dimensions of austerity The result is a ground breaking contribution to the study of austerity politics and policies **Contestants, Profiteers, and the Political Dynamics of Marketization** Helen Callaghan,2018-01-19 Since the early 1980s governments worldwide have taken many measures to expand the role of markets Recent political events reflect widespread disenchantment with neoliberal policies but it remains doubtful whether populist leaders will deliver the market restraints that many of their voters expect This book explains the resilience of marketization processes by highlighting the role of profiteers namely those who like the organizer of a cock fight benefit from contests regardless of who wins By setting up shop on the sidelines profiteers accumulate resources that boost political efforts to maintain and expand the arena of competition Evidence comes from the evolution of support for shareholder rights relating to takeover bids among key interest groups and political parties in three countries since the late nineteenth century *Handbook of Cliometrics* Claude Diebolt,Michael Haupt,2024-05-22 This handbook is a milestone in the field of historical economics and econometric history through its emphasis on the concrete contribution of cliometrics to our knowledge in economics and history The articles in the handbook authored by the leading scholars in the fields stress the usefulness of cliometrics for economists historians and social scientists in general The handbook offers a comprehensive coverage of topics with each article providing an overview of the contributions of cliometrics to a particular topic The handbook has set a new standard of quality in the field by offering a world wide forum of discussion in cliometrics

**Chains of Finance** Diane-Laure Arjaliès, Philip Grant, Iain Hardie, Donald MacKenzie, Ekaterina Svetlova, 2017-06-23 Investment is no longer a matter of individual savers directly choosing which shares or bonds to buy Rather most of their money flows through a chain an often extended sequence of intermediaries What goes on in that chain is of huge importance The world's investment managers who are now almost as well paid as top bankers control assets equivalent in value to around a year of total global economic output In Chains of Finance five social scientists discuss the ways in which the intermediaries in the chain influence each other channel the flows of savers money enhance investment decisions and form audiences for each other's performances of financially competent selves The central argument of the book is that investment management is fashioned profoundly by the opportunities and constraints this chain creates Whether chains constrain or enable however they always entangle tying intermediaries to each other silently and profoundly shaping the investment management industry Chains of Finance is a novel analysis that will make students social scientists financial professionals and regulators looking at the workings of financial markets in a new light A must read for anyone looking for insights into the decision making processes of investment managers and those influenced by and working for them
