Hale and Kopp

On the night of July 23, 1844, a man named Thomas Kopp was observing the night sky in Andover through a telescope. He had already watched the sky with the telescope. Kopp noticed a faint glow that he had never seen before. He asked a friend who was with him to look at the new star. They found the new star almost in space. But the glow was not on the star!

The day was night in New Mexico. How did Kopp manage to look at the night sky through his telescope as he often did?

It was a very clear night. Kopp looked up with his telescope at a part of the sky he had been studying a few weeks earlier. Suddenly, he caught a glimpse. He had spotted something new. But it was a faint, fuzzy glow. Kopp had made a great mistake of what he saw. He believed he had just found a comet.

Kopp was shocked by the new star. Like Kopp, he did not find the object in the sky. Kopp had seen a message in a glass to Massachusetts that many of citizens. He told the people of the center what he had seen.

Thomas Kopp also sent a message to the center in Massachusetts. The next morning, he heard back from the center. Kopp, like Kopp, had discovered a new comet.

Twelve hours after Kopp and Kopp had first seen the comet, it had a name of Comet Hale-Bopp.
