LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: size, color, and shape of the lizards.

Did your teacher grade individual team efforts?

Yes, my teacher graded individual team efforts. We were given a list of questions to answer and we had to discuss our answers and then we had to write them down.

An adaptation is a structure or function that the organism has as a response to its environment. This ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation of the green lizard.

The green lizard has a green color that helps it blend in with its environment. This is an adaptation because it helps the lizard survive and reproduce in its environment.

Provide one evolutionary explanation for why lizards living in that environment are able to survive (i.e., they grow) more than others.

Lizards that live in that environment are able to survive more than others because they have adaptations that help them survive in that environment.
