Envision Math Scope And Sequence:

The Internal Coherence Framework Michelle L. Forman, Elizabeth Leisy Stosich, Candice Bocala, 2021-02-17 The Internal Coherence Framework presents a system of research based practices for assessing and developing the conditions that support adult and student learning in schools Internal coherence is defined as the ability of educators in a school or system to connect and align resources to carry out an improvement strategy engage in collective learning and use that learning to provide students with richer educational opportunities The internal coherence framework featured in the book brings together three important domains of research leadership for learning organizational improvement and instructional efficacy School or system leaders who progress through this book with colleagues will develop a shared vision for ambitious teaching and learning anchored in the instructional core organize the work of the leadership and teacher teams to advance this vision and build psychologically safe team school and system cultures to support the risk taking and constructive challenges necessary to move schools or systems to the next level of performance At the heart of the book is a survey and rubric that can help schools better understand their strengths and weaknesses and the kinds of resources they need to support student learning The book blends theory and practice to bring tested wisdom to bear on critical issues of education leadership and professional learning

Transforming Teaching in Math and Science Adam Gamoran, 2003-01-01 Teachers often want to learn new ideas and approaches to improve their teaching but their efforts are often blocked by structural constraints in their districts and schools How can schools overcome these barriers to provide more supportive environments for change The authors answer this question through the study of six cases of schools and districts where teachers and researchers collaborated to develop teaching for understanding in math and science This new book features a new conceptual model of how school resources relate to teaching and learning focusing not only on material resources such as time and money but also on human and social resources methods that administrators can use to support teachers who want to improve their teaching of math and science elements that professional developers should look for in a school environment when they are considering working with staff on teaching improvements and answers to important questions including how schools operate as organizations how they control work how they respond to changes in their environment and how they improve classroom teaching and learning

Are You in a Pickle? Patricia L. Pickles Ph. D., 2012-02 Patricia L Pickles Ph D is a native of Illinois and the mother of one daughter one son and four grandchildren She is currently retired from the public school system but runs her own consulting company A Standards of Excellence and Equity in Education Dr Pickles enjoys giving back to the community closing achievement gaps swimming traveling reading and spending time with family and friends Now that the author drives her own company and priorities she finally found the time to speak out through her writing She shares her stories and how to strategies for improving students performance and closing achievement gaps She talks candidly about lessons learned in education and leadership that you won t get from a regular textbook Readers are

encouraged to persevere through challenges barriers and setbacks Future suggestions for education are provided

Recruiting, Retaining, and Engaging African-American Males at Selective Public Research Universities Louis A. Castenel,Tarek C. Grantham,Billy J. Hawkins,2018-06-01 A problematic yet uncommon assumption among many higher education researchers is that recruitment retention and engagement of African American males is relatively similar and stable across all majority White colleges and universities In fact the harsh reality is that selective public research universities SPRUs have distinctive academic cultures that increase the difficulty of diversifying their faculty and student populations This book will discuss how traditions and elitist assumptions make it very difficult to recruit retain and engage African American males The authors will examine these issues from multiple perspectives in three sections that highlight research policies and practices impacting the experiences of African American males including Pre Collegiate Preparation African American Male Student Athletes and Undergraduate and Graduate Considerations for African American Male Initiatives
