Neuroinflammation and Behaviour Luba Sominsky, Adam K. Walker, Deborah M. Hodgson, 2015-07-21 The brain and immune system are involved in an intricate network of bidirectional communication This relationship is vital for optimal physiological and psychological development and functioning but can also result in unwanted outcomes In particular this interaction plays an important role in cognition mood and behaviour Neuroinflammation is known to contribute to neurological and affective disorders including impaired learning and memory depressive anxiety and schizoaffective symptoms as well as pain The development of these conditions often occurs on the backdrop of pre existing physical illnesses which give rise to increased activation of the immune system such as cancer obesity infection and autoimmune disorders Similarly psychological states can alter regulation of the immune system This has been most extensively studied in the context of stress and immune function Understanding the underlying mechanisms that lead to the onset of inflammation induced neuropathology and stress induced immune suppression will contribute to the development of novel and effective treatment strategies for both the disease and its neurological side effects In this research topic we explored the relationship between the immune system and the brain throughout life We include both original research and review papers from animal clinical and molecular perspectives

Decentralisation and Regional Development Eva Dick, Karin Gaesling, Daniel Inkoom, Teodoro Kausel, 2016-06-15 This book analyzes decentralisation regional development paths and success factors in different governance sectors in Ghana the Philippines Tanzania and Chile and discuss overarching aspects of relevance

Decentralisation which refers to the delegation of administrative responsibilities political decision making and fiscal powers to lower levels of government is now considered one of the most efficient engines of development In Sub Saharan Africa decentralised states have made more progress in reducing poverty than those states with lower decentralisation scores But in many countries decentralisation is still considered a work in progress with unsatisfactory results From a spatial point of view the link between decentralisation and regional and district development is particularly interesting Both in the North and in the South regional or district development is seen as holding the potential for advancing social and economic development and even more so in decentralised political settings Space based networks at the regional or district level are considered instrumental for responding to locally specific challenges e g in areas lagging behind economically
