Grade 7 History Geography Textbook:

Textbooks in American Society Philip G. Altbach, J. Donald Monan, S. J. Professor of Higher Education and Director Philip G. Altbach, Gail P. Kelly, Hugh G. Petrie, Lois Weis, 1991-01-01 In recent years textbooks have been widely criticized for low standards, lack of imaginativeness and insensitivity to racial and gender issues. Increasingly they are cited as another weak link in American public education. This book goes beyond the headlines to examine how textbooks are produced, how they are selected, and what pressures are placed on textbook authors and publishers. The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy, the determinants of textbook content, the role of textbooks in educational reform, and the process of selection at the state level. The authors offer current research on textbook policy, including perspectives from those directly involved with textbooks from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction.

Designed by leading educators, the product line covers a range of subjects including mathematics, sciences, language arts, social studies, history, government, fine arts, and character. **Multiple Alterities** Elie Podeh, Samira Alayan, 2017-12-18 This book highlights and examines the role of the textbook in legitimising established political and social orders. It analyses the way in which the 'other' is presented in school textbooks, focusing on a number of countries in the Middle East and North Africa (MENA) region, and argues that the role of textbooks in developing and maintaining a national identity should be afforded greater critical attention. Textbooks can help form national identities by developing a society's collective memory; this might involve a historical narrative which may be self-contradictory or even fabricated to a certain extent, including myths, symbols, and collective memories that divide us from them, and ultimately resulting in a dichotomy between the Self and the Other. As well as addressing a range of theoretical questions relating to the study of textbooks, generally, the volume also covers a broad spectrum of Middle Eastern states and societies, with contributions from Turkey, Iran, Egypt, Cyprus, Lebanon, Iraq, Kurdistan, Jordan, Morocco, Tunisia, Israel, and Palestine. It will be essential reading for researchers and students working in the fields of Education, Sociology, and History, particularly those

with an interest in national identities in the MENA region **Textbooks in School and Society** Arthur Woodward, David L. Elliot, Kathleen Carter Nagel, 2013-08-21 Textbooks have been standard schoolroom fixtures for as long as most living citizens of this country can remember Many turn of the century students were introduced to reading through the moralistic McGuffey Readers and struggled through the rather drab and colorless pages of volumes on history geography and civics In contrast today s textbooks contain not only narrative content accompanied by colorful photographs and graphics but also section and chapter exercises that are extended through the use of worksheets and other materials Moreover the textbook and its related student materials are packaged together with teacher s editions and tests in grade level sets that amount to content area programs rather than mere texts *Materials and Methods in the Middle Grades* Joseph Lindsey Henderson, 1928
