

Answer the following questions in your own words using the textbook as your resource. Answer with complete sentences.

1. Use the following terms in sentences that explain the relationship between the terms:
a. genes
b. alleles

Explain what a mutation does and its importance to genetic differences between individuals. How do mutations contribute to genetic differences?

2. Use the following terms in sentences that explain the relationship between the terms:
a. evolution
b. trait
c. variation

Explain how genetic inheritance and environmental factors influence the traits and the frequency of traits in a population. How do these factors interact to influence the frequency of traits in a population? **Explain the relationship between the terms.**

3. What are the five themes of geography? Why are they important?

How has human geography changed? Explain the changes, support, movement, and human-environment interaction. There are human and human-environment interaction. The five themes of geography are location, place, region, movement, and human-environment interaction.

4. What are the different characteristics of genes and traits?

Genes are a segment of DNA that codes for a trait. They are the basic units of heredity. Traits are the characteristics of an organism. They are the result of the interaction of genes and the environment. The relationship between genes and traits is complex. Genes are the instructions for building a protein. The protein then builds the trait. The relationship between genes and traits is complex. Genes are the instructions for building a protein. The protein then builds the trait. **Explain the relationship between the terms.**

5. What is the difference between a gene and a trait? Why are they important?

The difference between a gene and a trait is that a gene is a segment of DNA that codes for a trait. A trait is the characteristic of an organism. The relationship between genes and traits is complex. Genes are the instructions for building a protein. The protein then builds the trait. **Explain the relationship between the terms.**

6. How do genetic differences influence traits?
