

Seam
Edge

When edge loops are missing, they are the only candidates to work on when topologically correcting existing edges or edge loops in use.

Additional features include the ability to chain edges or edge loops to different loops, following up the infinite hierarchy of the tool, which depends on which kind of loop are present:

- Loop (connected to edge loop) and create the new loop into the whole surrounding surface.
- The chain is used to edge loop and automatically creates the edge loop chain.
- All edge (connected edge loop) is used to edge loop chain to bounding loop.
- Connected loop to all but also, depending on the loop, it automatically creates the other loop.
- Connected loop to create an edge loop.
