**Understanding Sustainability with Pedagogical Practice** Osvaldo Muñoz Solari,Gabriele Schrüfer,2023-07-30 This book shares with an international audience of teachers scholars and policymakers the experience of pedagogical practices to facilitate sustainability in the world Sustainability is seen here as a journey toward the end state of sustainable development Therefore the authors contribute different roads to engage teachers and students with pedagogical discourse Overall the book demonstrates the value of powerful knowledge through action oriented learning based on a bottom up process Consequently pedagogical practices are understood as the instructional approaches based on a social constructivist model in which active learning is performed with student to student engagement Secondary teachers in social sciences and university professors in geography find the study to be a valuable source of stimulation for incorporating new ideas and resolving common problems in their learning and teaching environments Education policymakers around the world also benefit from the only publication that presents international perspectives on geographical knowledge related to sustainability The contributing authors are experienced scientists in the field of geography education who are giving special attention to pedagogical practices that promote new directions toward sustainable thinking This book is the first outcome of an international collaboration officially established in 2023 between the Department of Geography and Environmental Studies at Texas State University and the Department of Geography at the University of Bayreuth

**Dislocating the Orient** Daniel Foliard,2017-04-13 While the twentieth century s conflicting visions and exploitation of the Middle East are well documented the origins of the concept of the Middle East itself have been largely ignored With Dislocating the Orient Daniel Foliard tells the story of how the land was brought into being exploring how maps knowledge and blind ignorance all participated in the construction of this imagined region Foliard vividly illustrates how the British first defined the Middle East as a geopolitical and cartographic region in the nineteenth and early twentieth centuries through their imperial maps Until then the region had never been clearly distinguished from the East or

the Orient In the course of their colonial activities however the British began to conceive of the Middle East as a separate and distinct part of the world with consequences that continue to be felt today As they reimagined boundaries the British produced disputed and finally dramatically transformed the geography of the area both culturally and physically over the course of their colonial era Using a wide variety of primary texts and historical maps to show how the idea of the Middle East came into being Dislocating the Orient will interest historians of the Middle East the British empire cultural geography and cartography

**River Dynamics** Bruce L.
