[Grades 6-8]** Kimberly Morrow-Leong, Sara Delano Moore, Linda M. Gojak, 2020-08-21 Help students reveal the math behind the words I don't get what I'm supposed to do This is a common refrain from students when asked to solve word problems Solving problems is about more than computation Students must understand the mathematics of a situation to know what computation will lead to an appropriate solution Many students often pluck numbers from the

problem and plug them into an equation using the first operation they can think of or the last one they practiced. Students also tend to choose an operation by solely relying on key words that they believe will help them arrive at an answer without careful consideration of what the problem is actually asking of them. **Mathematize It: Going Beyond Key Words to Make Sense of Word Problems** Grades 6-8 shares a reasoning approach that helps students dig into the problem to uncover the underlying mathematics, deeply consider the problem's context, and employ strong operation sense to solve it. Through the process of mathematizing, the authors provide an explanation of a consistent method and specific instructional strategies to take the initial focus off specific numbers and computations and put it on the actions and relationships expressed in the problem. Sure to enhance teachers' own operation sense, this user-friendly resource for Grades 6-8 offers a systematic mathematizing process for students to use when solving word problems. Gives practice opportunities and dozens of problems to leverage in the classroom. Provides specific examples of questions and explorations for multiplication and division fractions and decimals, as well as operations with rational numbers. Demonstrates the use of visual representations to model problems with dozens of short videos. Includes end-of-chapter activities and reflection questions. How can you help your students understand what is happening mathematically when solving word problems? **Mathematize It** **Resources in Education**

, 1996 **Engage and Empower** Mary Amanda Stewart, Christina Salazar, Victor Antonio Lozada, Christina Thomas, 2021-12-15. This edited book provides ready-to-use engaging curriculum units for an integrated approach to teaching English language arts and U.S. history in grades 4-12. The purpose is to promote social justice and activism while building critical literacies students need in the 21st Century. Through implementing the curriculum units in this book, teachers and students can challenge inequities and promote activism. A central goal of this project is to represent and empower marginalized students. The traditional curriculum presents one view, one story as the only story, and one people as the norm. This book intentionally centers the experiences of Black Indigenous People of Color (BIPOC) and other marginalized communities. In addition to expanding the curriculum to include all people, educating students about issues of injustice in the U.S. will enable them to enact change. Additionally, this book serves to educate all students by exposure to central issues in past and present society. By creating space for a multicultural perspective, this curriculum may reduce the friction that occurs when encountering those whose lived experiences and perspectives do not align with one's own. By educating students about the privileges they have not examined, teachers can foster empathy and empower allies.
