Urban Animals Tora Holmberg, 2015-03-27 The city includes opportunities as well as constraints for humans and other animals alike Urban animals are often subjected to complaints they transgress geographical legal as and cultural ordering systems while roaming the city in what is often perceived as uncontrolled ways But they are also objects of care conservation practices and bio political interventions What then are the more than human experiences of living in a city What does it mean to consider spatial formations and urban politics from the perspective of human animal relations This book draws on a number of case studies to explore urban controversies around human animal relations in particular companion animals free ranging dogs homeless and feral cats urban animal hoarding and crazy cat ladies The book explores zoocities the theoretical framework in which animal studies meet urban studies resulting in a reframing of urban relations and space Through the expansion of urban theories beyond the human and the resuscitation of sociological theories through animal studies literature the book seeks to uncover the phenomenon of humanimal crowding both as threats to be policed and as potentially subversive In this book a number of urban controversies and crowding technologies are analysed finally pointing at alternative modes of trans species urban politics through the promises of humanimal crowding of proximity and collective agency The exclusion of animals may be an urban ideology aiming at social order but close attention to the level of practice reveals a much more diverse disordered and perhaps disturbing experience

Contrasts in Punishment John Pratt, Anna Eriksson, 2014-06-03 Why do some modern societies punish their offenders differently to others Why are some more punitive and others more tolerant in their approach to offending and how can these differences be explained Based on extensive historical analysis and fieldwork in the penal systems of England Australia and New Zealand on the one hand and Finland Norway and Sweden on the other this book seeks to answer these questions The book argues that the penal differences that currently exist between these two clusters of societies emanate from their early nineteenth century social arrangements when the Anglophone societies were dominated by exclusionary value systems that contrasted with the more inclusionary values of the Nordic countries The development of their penal

programmes over this two hundred year period including the much earlier demise of the death penalty in the Nordic countries and significant differences between the respective prison rates and prison conditions of the two clusters reflects the continuing influence of these values Indeed in the early 21st century these differences have become even more pronounced John Pratt and Anna Eriksson offer a unique contribution to this topic of growing importance comparative research in the history and sociology of punishment This book will be of interest to those studying criminology sociology punishment prison and penal policy as well as professionals working in prisons or in the area of penal policy across the six societies that feature in the book
