The Internal Coherence Framework Michelle L. Forman, Elizabeth Leisy Stosich, Candice Bocala, 2021-02-17 The Internal Coherence Framework presents a system of research based practices for assessing and developing the conditions that support adult and student learning in schools Internal coherence is defined as the ability of educators in a school or system to connect and align resources to carry out an improvement strategy engage in collective learning and use that learning to provide students with richer educational opportunities The internal coherence framework featured in the book brings together three important domains of research leadership for learning organizational improvement and instructional efficacy School or system leaders who progress through this book with colleagues will develop a shared vision for ambitious teaching and learning anchored in the instructional core organize the work of the leadership and teacher teams to advance this vision and build psychologically safe team school and system cultures to support the risk taking and constructive challenges necessary to move schools or systems to the next level of performance At the heart of the book is a survey and rubric that can help schools better understand their strengths and weaknesses and the kinds of resources they need to support student learning The book blends theory and practice to bring tested wisdom to bear on critical issues of education leadership and professional learning

Transforming Teaching in Math and Science Adam Gamoran, 2003-01-01 Teachers often want to learn new ideas and approaches to improve their teaching but their efforts are often blocked by structural constraints in their districts and schools How can schools overcome these barriers to provide more supportive environments for change The authors answer this question through the study of six cases of schools and districts where teachers and researchers collaborated to develop teaching for understanding in math and science This new book features a new conceptual model of how school resources relate to teaching and learning focusing not only on material resources such as time and money but also on human and social resources methods that administrators can use to support teachers who want to improve their teaching of math and science elements that professional developers should look for in a school environment when they are considering working with staff on teaching improvements and answers to important questions including how schools operate as organizations how they control work how they respond to changes in their environment and how they improve classroom teaching and learning
