Writing Projects for Mathematics Courses Annalisa Crannell,Gavin LaRose,Thomas Ratliff,Elyn Rykken,2004-12-31 Writing Projects for Mathematics Courses is a collection of writing projects suitable for a wide range of undergraduate mathematics courses from a survey of mathematics to differential equations The projects vary in their level of

difficulty and in the mathematics that they require but are similar in the mode of presentation and use of applications. Students see these problems as real in a way that textbook problems are not even though many of the characters involved e.g. dime store detectives and CEOs are obviously fictional. The stories are sometimes fanciful and sometimes grounded in standard scientific applications but the mere existence of the story draws the students in and makes the problem relevant.

Differentiating Instruction With Menus for the Inclusive Classroom Laurie E. Westphal, 2021-09-03. Differentiating Instruction With Menus for the Inclusive Classroom Social Studies for grades 3-5 offers teachers everything they need to create a student centered learning environment based on choice. This book provides five different types of menus that students can use to select exciting products that they will develop so teachers can assess what has been learned instead of using a traditional worksheet format. Topics addressed include ancient history, American history, government, U.S. documents, people in history and geography. Differentiating Instruction With Menus for the Inclusive Classroom Social Studies provides numerous types of leveled menus that lower and on level elementary aged students can use to demonstrate learning through a method of their choice. Menus with similar formats but geared towards varying ability levels allow teachers to differentiate easily. Using the creative and challenging choices found in Three Shape menus, Tic Tac Toe menus, List menus, 2-5-8 menus and Game Show menus, students will look forward to sharing their newfound knowledge throughout the year. Also included are specific guidelines for products, rubrics for assessing student products and teacher introduction pages for each menu. Beyond the technical aspects of teaching this subject, what is the best way to keep students engaged and challenged while teaching them skills that will help make them college and career ready? Spanning lesson plans, video production activities, assessment and more, this book supplies a comprehensive step by step guide to teaching a television production class using whatever equipment is readily available. It focuses on the critical aspects of how to teach television production and organize lessons rather than the quickly evolving details of what equipment or editing software to use. The authors also provide lessons on creating and executing a daily newscast, show how to evaluate that show and collect school wide data for further evaluation and improvement and how to archive and mount these productions on the school website. **Multimedia Projects in Education** Karen S.
