Public Water Policies Charles R. Porter Jr., 2018-08-31 Although water is nature's most important molecule its regulation and management are among the most challenging public policy issues for any society Water is the common denominator of all life on earth Public water policies then become the fundamental foundations of community formation anywhere Cities exist in their places based on the local access to adequate amounts of fresh water Without fair workable and transparent public water policy any society is threatened with socio economic destruction especially in the arid areas living under severe drought and the threat of warming trends worldwide Public Water Policies The Ultimate Weapons of Social Control Provides an interdisciplinary view of water policies worldwide Critically analyzes the consequences of water policies around the world many that are not only overlooked but that have never been considered Analyzes the conflicts in social values of any society that demand hard choices between population growth economic growth and the environment Provides a new perspective on the overall long reaching economic consequences of water policy Offers four new terms to describe public water policies in relation to social control due process social control deceptive social control diplomatic social control and destructive social control Compares and contrasts water policies in key places in the world using the new terms of social control to enlighten the public and especially those water policymakers worldwide *International Crisis Management: NATO, EU, OSCE and Civil Society* S. Goda, O. Tytarchuk, M. Khylo, 2016-05-03 Since the end of the Cold War numerous conflicts have emerged within the Euro Atlantic and Eurasian space which have affected international relations and highlighted the need for effective strategies for conflict resolution and management This book presents papers delivered at the NATO Advanced Research Workshop ARW Best Practices and Lessons Learned in Conflict Management held in Bratislava Slovak Republic in June 2015 The authors of these texts are recognized authorities within their fields of expertise Issues raised by the conflict in Ukraine were the main focus of the workshop as they are of this book but it also contains valuable information about situations in other countries such as the Republic of Moldova Afghanistan Bosnia and Herzegovina and Belarus The book presents an analysis of the theoretical background of conflict management and its relevance for multilateral security institutions It explores various approaches to conflict management discusses possible future developments examines new aspects of conflict resolution and outlines the role of international organizations and civil society in these processes Providing an overview of current thought in the field this book will be of interest to all those involved in or connected with the processes of conflict management and resolution *Refugees in Extended Exile* Jennifer Hyndman, Wenona Giles, 2016-10-04 This book argues that the international refugee regime and its temporary humanitarian interventions have failed Most refugees across the globe live in protracted conditions that extend from years to decades without legal status that allows them to work and establish a home It is contended that they become largely invisible to people based in the global North and cease to remain fully human subjects with access to their political lives Shifting the

conversation away from the salient discourse of solutions and technical fixes within state centric international relations the authors recover the subjectivity lost for those stuck in extended exile The book first argues that humanitarian assistance to refugees remains vital to people s survival even after the emergency phase is over It then connects asylum politics in the global North with the intransigence of extended exile in the global South By placing the urgent crises of protracted exile within a broader constellation of power relations both historical and geographical the authors present research and empirical findings gleaned from refugees in Iran Kenya and Canada and from humanitarian and government workers Each chapter reveals patterns of power circulating through the colonial present Cold War legacies and the global war on terror Seeking to render legible the more quotidian struggles and livelihoods of people who find themselves defined as refugees this book will be of great interest to international humanitarian agencies as well as migration and refugee researchers including scholars in refugee studies and human displacement human security globalization immigration and human rights

Land Fictions D. Asher Ghertner, Robert W. Lake, 2021-03-15 Land Fictions explores the common storylines narratives and tales of social betterment that justify and enact land as commodity It interrogates global patterns of property formation the dispossessions property markets enact and the popular movements to halt the growing waves of evictions and land grabs This collection brings together original research on urban rural and peri urban India rapidly urbanizing China and Southeast Asia resource expropriation in Africa and Latin America and the neoliberal urban landscapes of North America and Europe Through a variety of perspectives Land Fictions finds resonances between local stories of land s fictional powers and global visions of landed property s imagined power to automatically create value and advance national development Editors D Asher Ghertner and Robert W Lake unpack the dynamics of land commodification across a broad range of political spatial and temporal settings exposing its simultaneously contingent and collective nature The essays advance understanding of the politics of land while also contributing to current debates on the intersections of local and global urban and rural and general and particular Contributors Erik Harms Michael Watts Sai Balakrishnan Brett Christophers David Ferring Sarah Knuth Meghan Morris Benjamin Teresa Mi Shih Michael Levien Michael L Dwyer Heather Whiteside

Paper Trails Cameron Blevins, 2021-03-04 A groundbreaking history of how the US Post made the nineteenth century American West There were five times as many post offices in the United States in 1899 than there are McDonald s restaurants today During an era of supposedly limited federal government the United States operated the most expansive national postal system in the world In this cutting edge interpretation of the late nineteenth century United States Cameron Blevins argues that the US Post wove together two of the era s defining projects western expansion and the growth of state power Between the 1860s and the early 1900s the western United States underwent a truly dramatic reorganization of people land capital and resources It had taken Anglo Americans the better part of two hundred years to occupy the eastern half of the continent yet they occupied the West within

a single generation As millions of settlers moved into the region they relied on letters and newspapers magazines and pamphlets petitions and money orders to stay connected to the wider world Paper Trails maps the spread of the US Post using a dataset of more than 100 000 post offices revealing a new picture of the federal government in the West The western postal network bore little resemblance to the civil service bureaucracies typically associated with government institutions Instead the US Post grafted public mail service onto private businesses contracting with stagecoach companies to carry the mail and paying local merchants to distribute letters from their stores These arrangements allowed the US Post to rapidly spin out a vast and ephemeral web of postal infrastructure to thousands of distant places The postal network s sprawling geography and localized operations forces a reconsideration of the American state its history and the ways in which it exercised power

Globalization Development and Social Justice Ann El Khoury,2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies

Belarus under Lukashenka Matthew Frear,2018-09-03 This book explores the nature of the regime of Aliaksandr Lukashenka who has ruled Belarus since 1994 and who is often characterized as the last dictator in Europe It discusses how Lukashenka came to power providing a survey of politics in Belarus in early post Soviet times examines how power became personalized under his regime and considers how he coerced opponents whilst maintaining good popular support The book discusses all aspects of politics including presidential power the ruling elites elections the opposition and civil society The author characterizes Lukashenka s rule as adaptive authoritarianism and demonstrates how the regime s avoidance of any ideology even nationalism permits great freedom of manoeuvre enabling pragmatic adaptation to changing circumstances

The Routledge Companion to Global Value Chains Renu Agarwal,Christopher Bajada,Roy Green,Katrina Skellern,2021-09-30 This Companion provides a review of global value chains GVCs and the megatrends that

are shaping them and will continue to reshape them in deep set trajectories of change over the next few decades Megatrends herald both challenges and opportunities With the growing interest among business leaders and researchers in GVCs this is a reference work which fills a gap in current literature by focusing on the new features of GVCs including the shift of global purchasing power towards developing economies the significance of emerging technologies and data analytics the increasing tensions between globalisation and de globalisation and the role of micro multinationals start up entrepreneurs the public sector and middle markets in a fast changing global economy The early chapters are essentially intradisciplinary in character with the first seeking to explore some historical aspects of GVCs Subsequent chapters cover the theory and practice of operations and supply chain management emerging supply chain technologies and the impact of inter firm collaboration across sectors and economies The final chapters take a more interdisciplinary approach and examine topics at the interface of GVCs with the economy society culture and politics This comprehensive handbook provides a timely analysis of leading edge global megatrends and practices in one volume

The Uneven Offshore World Justin Robertson, Michael Tyralla, 2022-03-24 Informed by world systems analysis this book examines the shifting patterns of accommodation and resistance to the offshore world with a particular focus on Mauritius as a critical but underappreciated offshore node mediating foreign investment into India and Africa Drawing on a large pool of financial data and elite interviews the authors present the first detailed comparative study of the Mauritius India and Mauritius Africa offshore relationships These relationships serve as indicative test cases of the contemporary global tax reform agenda and its promise to rein in offshore finance Whereas India s economic power and multilateral track record have enabled it to actively shape this agenda and implement it in a robust manner most African countries have found themselves either unable to meet its stringent criteria or unwilling to do so out of fear that it might discourage investment Its impact on offshore financial centers has likewise been limited A few of the least sophisticated ones appear to have fallen by the wayside but the rest have either remained largely unaffected or like Mauritius succeeded in consolidating their operations and surviving the current round of regulatory headwinds The findings suggest that the contemporary global tax reform agenda has thus far not only failed to make good on its promise but also actually reinforced numerous existing power hierarchies The Uneven Offshore World is written in an accessible style and aimed at readers without specialized knowledge of tax issues

Assembling Petroleum Production and Climate Change in Ecuador and Norway Elisabeth Marta Tómmerbakk, 2021-08-01 This book addresses some of the controversies and uncertainties associated with reducing the extensive exploitation of fossil fuels due to their role in global warming Elisabeth Marta Tómmerbakk explores why a transition towards a post carbon society is so difficult to accomplish by examining how the relationship between petroleum production and climate change is politically framed and negotiated in contested cases This question is approached through a process oriented comparative case study of Lofoten located in the Norwegian Sea above the Arctic Circle and Yasun ITT Ishpingo Tambococha and Tiputini located in the Ecuadorian Amazon

regions that both belong to oil exporting countries with highly oil dependent economies T mmerbakk draws on rich empirical data that includes qualitative interviews with subjects in both countries and applies an Actor Network Theory framework to show that oil and climate are intricately entangled in knowledge and policy practices Overall Assembling Petroleum Production and Climate Change in Ecuador and Norway provides an in depth examination of how climate science and petroleum extraction are negotiated adapted assembled and coordinated with other national policies and political aims This book will be of great interest to students and scholars of petroleum production climate change environmental policy and environmental sociology
