Vanishing Frontiers Andrew Selee, 2018-06-05 There may be no story today with a wider gap between fact and fiction than the relationship between the United States and Mexico Wall or no wall deeply intertwined social economic business cultural and personal relationships mean the US Mexico border is more like a seam than a barrier weaving together two economies and cultures Mexico faces huge crime and corruption problems but its remarkable transformation over the past two decades has made it a more educated prosperous and innovative nation than most Americans realize Through portraits of business leaders migrants chefs movie directors police officers and media and sports executives Andrew Selee looks at this emerging Mexico showing how it increasingly influences our daily lives in the United States in surprising ways the jobs we do the goods we consume and even the new technology and entertainment we enjoy From the Mexican entrepreneur in Missouri who saved the US nail industry to the city leaders who were visionary enough to build a bridge over the border fence so the people of San Diego and Tijuana could share a single international airport to the connections between innovators in Mexico's emerging tech hub in Guadalajara and those in Silicon Valley Mexicans and Americans together have been creating productive connections that now blur the boundaries that once separated us from each other

Asia's New Geopolitics Desmond Ball, Lucie Béraud-Sudreau, Tim Huxley, C. Raja Mohan, Brendan Taylor, 2021-09-28 Intensifying geopolitical rivalries rising defence spending and the proliferation of the latest military technology across Asia suggest that the region is set for a prolonged period of strategic contestation None of the three competing visions for the future of Asian order a US led Free and Open Indo Pacific a Chinese centred order or the ASEAN inspired Indo Pacific Outlook is likely to prevail in the short to medium term In the absence of a new framework the risk of open conflict is heightened and along with it the need for effective mechanisms to maintain peace and stability As Asia's leaders seek to rebuild their economies and societies in the wake of COVID 19 they would do well to reflect upon the lessons offered by the pandemic and their applicability in the strategic realm The societies that have navigated the crisis most effectively have been able to do so by putting in place stringent protective measures Crisis management and avoidance

mechanisms and even in the longer term wider arms control can be seen as the strategic equivalent of such measures and as such they should be pursued with urgency in Asia to reduce the risks of an even greater calamity

educational research **The Injustice of Property** Stephen Przybylinski, 2025-06-01 With the rise of homelessness in many U S cities municipal governments are sanctioning organized encampments as an official strategy for sheltering unhoused people Examining the shortcomings and consequences of these municipal policies *The Injustice of Property* explores how unhoused individuals living in self managed encampments navigate and organize themselves within and against the confines of liberal property systems Through ethnographic research in Portland Oregon a paradigmatic city in advancing this model of homeless shelter Stephen Przybylinski details the everyday struggles of self managed encampments to highlight how key contradictions inherent to liberal ideology maintain property as a means of structuring sociopolitical equality He argues that justice cannot be realized for unhoused communities within the liberal model of private property due to how liberalism and liberal ideology prioritize the rights and values of property over the personal rights of self governance *The Injustice of Property* is a conceptually robust and empirically rich account of the limits of liberal thinking regarding what just property relations look like for unhoused and housed people alike The book shows that while encampment communities struggle to establish alternative property relationships to the traditional model of private ownership the injustices that residents of encampments face provoke a necessary reevaluation of how beneficiaries of property systems influence who can become housing stable and on which terms This insightful book reveals how the injustices surrounding Portland s encampment communities reflect the limits and injustice of liberal property more broadly *The European Union and the Black Sea* Sinem Akgul Acikmese, Dimitrios Triantaphyllou, 2017-10-02 The idea for this book is derived from the scantiness of academic references on the European Union s policies towards the Black Sea relative to this region s officially stated significance for the EU Even though the EU plays a vital role in Black Sea political agendas the EU s cooperation with the region is not extensively covered by academic discussions and literature This is mostly due to the fact that the EU s focus on foreign affairs is mainly associated with the Balkans as part the current and potential expansion and the Middle East as a direct consequence of the upheaval of the Arab Spring The Black Sea region is crucially important for the EU because of the opportunities and challenges that the region presents both politically and socio economically Contributions to this book mostly focus on specific issues of EU Black Sea cooperation from conflict to the environment to democracy and how these particular relationships are perceived within the region as well as through the lenses of stakeholders such as Russia Turkey and the USA Overall the collection focuses on projecting a more efficient role and a holistic strategy for the EU in its approach towards the Black Sea region testifying to the need for a strong EU presence For this reason the Black Sea area remains the neighbourhood too close to yet still far from the European Union This book was originally published as a special issue of the *Journal of Balkan and Near Eastern Studies* *Why Women Will Save the Planet* Friends of the Earth, C40 Cities, 2018-03-01 Big cities don t have to mean a dystopian future They can be turned around to be powerhouses of well being and environmental sustainability if we empower women This book is a unique collaboration between C40 and Friends

of the Earth showcasing pioneering city mayors key voices in the environmental and feminist movements and academics The essays collectively demonstrate both the need for women s empowerment for climate action and the powerful change it can bring A rallying call for the planet for women for everyone China's Economy Iris Claus,Les Oxley,2015-02-16 This collection of critical surveys provides readers with a range of up to date work from leading scholars in the area writing on some of the key issues facing China as they survey the present and future challenges of the Chinese economy Nine papers provide detailed discussion on key aspects of the past present and future of the Chinese economy Leaders in their relevant fields of scholarship tackle some of the critical issues facing China Contributors identify common themes including the household registration system urbanization demographic transition inequality and the sustainability of economic growth Articles provide a critical review of the literature and discuss policy implications and areas for future research
