attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

Place, Diversity and Solidarity Stijn Oosterlynck, Nick Schuermans, Maarten Loopmans, 2017-05-08 In many countries particularly in the Global North established forms of solidarity within communities are said to be challenged by the increasing ethnic and cultural diversity of the population Against the backdrop of renewed geopolitical tensions which inflate and exploit ethno cultural rather than political economic cleavages concerns are raised that ethnic and cultural diversity challenge both the formal mechanisms of redistribution and informal acts of charity reciprocity and support which underpin common notions of community This book focuses on the innovative forms of solidarity that develop around the joint appropriation and the envisaged common future of specific places Drawing on examples from schools streets community centres workplaces churches housing projects and sporting projects it provides an alternative research agenda from the loss of community narrative It reflects on the different spatiotemporal frames in which solidarities are nurtured the connections forged between solidarity and citizenship and the role of interventions by professionals to nurture solidarity in diversity This timely and original work will be essential reading for those working in human geography sociology ethnic studies social work urban studies political studies and cultural studies
