Oregon Historical Quarterly Oregon Historical Society, 2016 **Japan's Secret War** Robert K. Wilcox, 2019-12-10

This groundbreaking investigation reveals how a secret atomic weapons program in WWII Japan led to today's North Korean security crisis Japan's Secret War explores one of the least known yet highly significant episodes of World War II Japan's frantic race to develop its own atomic bomb Journalist and historian Robert Wilcox then shows how Japan's efforts evolved

into North Korea's nuclear program and the looming threat it presents to mankind. After decades of research into national intelligence archives in the US and abroad, Wilcox presents a detailed account of Japan's version of the Manhattan Project. He traces its development from inception to the possible detonation of a nuclear device in 1945. Wilcox weaves a fascinating portrait of the secret industrial complex where Japan's atomic research culminated. And it is there that North Korea, following the Japanese defeat, salvaged what remained and fashioned its own nuclear program. Japan's Secret War is still spellbinding. It is intriguing and disturbing, and Robert Wilcox deserves high praise for his meticulous research. Historynet.com

We Could Not Fail Richard Paul, Steven Moss, 2015-05-01. The Space Age began just as the struggle for civil rights forced Americans to confront the long and bitter legacy of slavery, discrimination, and violence against African Americans. Presidents John F. Kennedy and Lyndon Johnson utilized the space program as an agent for social change, using federal equal employment opportunity laws to open workplaces at NASA and NASA contractors to African Americans while creating thousands of research and technology jobs in the Deep South to ameliorate poverty. *We Could Not Fail* tells the inspiring, largely unknown story of how shooting for the stars helped to overcome segregation on earth. Richard Paul and Steven Moss profile ten pioneer African American space workers whose stories illustrate the role NASA and the space program played in promoting civil rights. They recount how these technicians, mathematicians, engineers, and an astronaut candidate surmounted barriers to move, in some cases literally, from the cotton fields to the launching pad. The authors vividly describe what it was like to be the sole African American in a NASA work group and how these brave and determined men also helped to transform Southern society by integrating colleges, patenting new inventions, holding elective office, and reviving and governing defunct towns. Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration, *We Could Not Fail* demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement.

Investigating Light and Shadow with Young Children (Ages 3-8) Beth Dykstra Van Meeteren, 2022-06-17. Children are intrigued by switches that power a light source and by items that

 Michael Riordan,Lillian Hoddeson,Adrienne W. Kolb,2015-11-20 In October 1993 the US Congress terminated the
 Superconducting Super Collider at the time the largest basic science project ever attempted with a total cost estimated to
 exceed 10 billion Its termination was a watershed event a pivot point not only in the history of physics but also for science in
 general Tunnel Visions follows the evolution of the endeavor from its origins in the Reagan Administration s military buildup
 of the early 1980s to its post Cold War demise a decade later The failure of the SSC raises the question of whether Big
 Science has become too big and expensive can scientists and their government backers effectively manage such enormous
 undertakings The case of the Super Collider offers important lessons about the conditions required to build and sustain a
 large scientific laboratory and the rise and fall of the SSC also serves as a cautionary tale about the long term viability of a
 research community that comes to depend as much as did US high energy physics upon a single experimental facility of such
 an unprecedented scale Riordan Hoddeson and Kolb have written the definitive history of the SSC **Who's who Among**
