Managing Ethiopian Cities In An Era Of Rapid Urbanisation:

Managing Ethiopian Cities in an Era of Rapid Urbanisation Meine Pieter van Dijk, Jan Fransen, 2008 Handbook on Transport and Urban Transformation in China Chia-Lin Chen, Haixiao Pan, Qing Shen, James J. Wang, 2020-03-28 Since 1978 when China embarked on a new period of economic reforms and introduced open door policies it has experienced a great urban transformation The role of transport has proved indispensable in this unprecedented rapid urbanisation and economic growth As the first research focused book dedicated to this important topic the Handbook on Transport and Urban Transformation in China offers new insight into the various opportunities and challenges brought by fast paced motorization and urban development and explores them in broad spatial economic environmental social and institutional dimensions

Insights on Resiliency and Urban Development Sonet, Ungku Norani, Mari, Tamil Salvi, 2024-07-12 Cities worldwide are at a crossroads facing the pressing need to adapt to a rapidly changing environment The impacts of climate change economic shifts and population growth are undeniable demanding a paradigm shift in urban development The conventional approaches fall short in creating spaces that endure and flourish in the face of adversity The challenge is to reimagine cities as more than concrete jungles integrating green spaces flexibility and community well being into their DNA Insights on Resiliency and Urban Development charts the course for a resilient urban future In its pages government leaders architects urban planners and citizens unite to forge a comprehensive guide for developing urban sanctuaries This book seamlessly weaves together disciplines like architecture urban design planning sustainability and community development offering not just theoretical groundwork but practical strategies illustrated with vibrant case studies It empowers individuals with the knowledge to build cities that not only withstand the challenges of our time but actively thrive amidst them The New Presence of China in Africa Meine Pieter van Dijk, 2009 This book describes China s growing range of activities in Africa especially in the sub Saharan region The three most important instruments China has at its disposal in Africa are development aid investments and trade policy The Chinese government which believes the Western development aid model has failed is looking for new forms of aid and development in Africa China s economic success can partly be ascribed to the huge availability of cheap labour which is primarily employed in export oriented industries China is looking for the required raw materials in Africa and for new marketplaces Investments are being made on a large scale in Africa by Chinese state controlled firms and private companies particularly in the oil producing countries Angola Nigeria and Sudan and countries rich in minerals Zambia Third the trade policy China is conducting is analysed in China and compared with that of Europe and the United States In case studies the specific situation in several African countries is examined In Zambia the mining industry construction and agriculture are described One case study of Sudan deals with the political presence of China in Sudan and the extent to which Chinese arms suppliers contributed to the current crisis in Darfur The possibility of Chinese diplomacy offering a solution in that conflict is discussed The conclusion considers whether social responsibility can be

expected of the Chinese government and companies and if this is desirable and to what extent the Chinese model in Africa can act as an example or not for the West Publisher's description

Design Strategies for Efficient and Sustainable Building Facilities González-Lezcano, Roberto Alonso, Sansaniwal, Sunil Kumar, 2024-08-05 Despite the growing emphasis on energy efficiency in building design our indoor environments often fall short of providing optimal conditions for health and well being Indoor air quality temperature and lighting levels play crucial roles in occupant health yet they are frequently overlooked in building practices This oversight leads to environments that can harm health contributing to respiratory problems allergies and reduced productivity Design Strategies for Efficient and Sustainable Building Facilities offers a comprehensive solution We delve into recent advances in building design construction and operation that prioritize energy efficiency and occupant health By incorporating intelligent sensors automation systems and renewable energy sources like solar and wind power buildings can be transformed into healthy sustainable spaces that promote well being This book is tailored for researchers professionals university professors and master's and doctoral students who seek to advance sustainable building practices

Ethiopian Labour Migration to the Gulf and South Africa Kefale, Asnake, Mohammed, Zerihun, 2016-05-11 The major objective of the research is to produce evidence based knowledge on the social and economic impacts of labour migration by looking at the challenges and opportunities of Ethiopian labour migration to the Gulf and South Africa On the one hand international migration from Ethiopia could be considered as an aspect of development problem The major push factors that forces Ethiopian migrants to the Gulf and South Africa are economic developmental problems ranging from lack of employment opportunities to wage differentials On the other hand international migration could be considered as an important resource that could be tapped for accelerating socio economic development At the general level this research aims to examine the successes and failures of policies and institutions in realising the potentials of international migration for socio economic development of the country and minimizing its adverse impacts At the same time the growing problem of illegal migration will be examined

sustainable planet **Urban Vulnerability and Climate Change in Africa** Stephan Pauleit,Adrien Coly,Sandra Fohlmeister,Paolo Gasparini,Gertrud Jørgensen,Sigrun Kabisch,Wilbard J. Kombe,Sarah Lindley,Ingo Simonis,Kumelachew Yeshitela,2015-04-13 Urbanisation and climate change are among the major challenges for sustainable development in Africa The overall aim of this book is to present innovative approaches to vulnerability analysis and for enhancing the resilience of African cities against climate change induced risks Locally adapted IPCC climate change scenarios which also consider possible changes in urban population have been developed Innovative strategies to land use and spatial planning are proposed that seek synergies between the adaptation to climate change and the need to solve social problems Furthermore the book explores the role of governance in successfully coping with climate induced risks in urban areas The book is unique in that it combines a top down perspective of climate change modeling with a bottom up perspective of vulnerability assessment quantitative approaches from engineering sciences and qualitative approaches of the social sciences a novel multi risk modeling methodology and strategic approaches to urban and green infrastructure planning with neighborhood perspectives of adaptation *Green Infrastructure for Sustainable Urban Development in Africa* John Abbott,2013-07-03 This book shows for the first time how green infrastructure can work in an African urban context On one level it provides a major rethinking of the role of infrastructure in urban society since the creation of networked infrastructure in the early twentieth century On another it explores the changing paradigms of urban development through the fundamental question of how decisions are made With a focus on Africa s fast growing secondary towns where 70 per cent of the urban population live the book explains how urban infrastructure provides the key to the relationship between economic development and social equity through the mediation of natural resources Adopting this view enables investment to be channelled more effectively to provide the engine for economic growth while providing equitable services for all residents At the same time the mediation of resource flows integrates the metabolism of the city into the wider ecosystem This vision leads to a new way of thinking about infrastructure giving clear definition to the concept of green infrastructure On the basis of research gathered throughout an extensive career John Abbott draws in particular from his experience in Ethiopia to demonstrate the ways in which infrastructure needs to respond to the economies societies and natural environments of twenty first century urban Africa *Grüne Infrastruktur / Green Infrastructure* Bund Deutscher Landschaftsarchitekten,2015-08-31 The more intensively we exploit the urban and rural landscape the greater the demands we place on our environment and what it can provide Demographic change shrinking cities urban expansion climate change and the transition to renewable energy sources are confronting us with challenges of ever greater magnitude Solar fields and bio energy crops are changing the face of the landscape and new traffic and energy infrastructure criss crosses the countryside Meanwhile vast efforts are being made to adapt existing infrastructure to meet changing demands In the process it has once again become clear that we must consider our use of natural resources not just from a local perspective but within a broader context Green infrastructure

strategies can take quite different forms ranging from floodwater protection measures to the integration of traffic and energy systems and the development of urban green. The goal for society is to improve the diversity and resilience of our environment and to minimize the effects of climate change. In essays, interviews and profiles of the best realized projects from the past few years, *Green Infrastructure* examines the challenges and tasks facing contemporary landscape architecture and what it can achieve to address them. This book is published on the occasion of the awarding of the German Landscape Architecture Prize 2015.

The Oxford Handbook of the Ethiopian Economy. Fantu Cheru, Christopher Cramer, Arkebe Oqubay, 2019-01-10. From a war-torn and famine-plagued country at the beginning of the 1990s, Ethiopia is today emerging as one of the fastest growing economies in Africa. Growth in Ethiopia has surpassed that of every other sub-Saharan country over the past decade and is forecast by the International Monetary Fund to exceed 8 percent over the next two years. The government has set its eyes on transforming the country into a middle income country by 2025 and into a leading manufacturing hub in Africa. The Oxford Handbook of the Ethiopian Economy studies this country's unique model of development where the state plays a central role and where a successful industrialization drive has challenged the long-held erroneous assumption that industrial policy will never work in poor African countries. While much of the volume is focused on post-1991 economic development policy and strategy, the analysis is set against the background of the long history of Ethiopia and more specifically on the Imperial period that ended in 1974, the socialist development experiment of the Derg regime between 1974 and 1991, and the policies and strategies of the current EPRDF government that assumed power in 1991. Including a range of contributions from both academic and professional standpoints, this volume is a key reference work on the economy of Ethiopia.

[Extreme Hydrology and Climate Variability](#). Assefa Melesse, Wossenu Abtew, Gabriel Senay, 2019-07-03. Extreme Hydrology and Climate Variability: Monitoring, Modelling, Adaptation, and Mitigation is a compilation of contributions by experts from around the world who discuss extreme hydrology topics from monitoring to modeling and management. With extreme climatic and hydrologic events becoming so frequent, this book is a critical source adding knowledge to the science of extreme hydrology. Topics covered include hydrometeorology, monitoring climate variability and trends, hydrological variability and trends, landscape dynamics, droughts, flood processes, and extreme events management, adaptation, and mitigation. Each of the book's chapters provides background and theoretical foundations, followed by approaches used and results of the applied studies. This book will be highly used by water resource managers and extreme event researchers who are interested in understanding the processes and teleconnectivity of large-scale climate dynamics and extreme events, predictability, simulation, and intervention measures. Presents datasets used and methods followed to support the findings included, allowing readers to follow these steps in their own research. Provides

variable methodological approaches thus giving the reader multiple hydrological modeling information to use in their work Includes a variety of case studies thus making the context of the book relatable to everyday working situations for those studying extreme hydrology Discusses extreme event management including adaption and mitigation **CORP 2011 Proceedings/Tagungsband** Manfred Schrenk,Vasily V.
