Sociocultural Perspectives on Youth Ethical Consumerism Giuliano Reis, Michael Mueller, Rachel Gisewhite, Luiz Siveres, Renato Brito, 2017-11-07 This exciting new book advances current practice based and theoretical knowledge around how youth defines and engages with consumerism to provoke a larger conversation within science and environmental education. It is also geared towards unveiling those literacy praxes that can assist youth to adopt more ethically oriented consumerist habits. More specifically, this book studies how youth's participation in the global consumer market intersects with media technologies, new literacies, as well as science and the environment from sociocultural perspectives. In addition, it considers how school science has mediated youth participation in hyper consumerism from food and technology to shelter and transportation. This important and timely book is a must read for those interested in topics such as critical youth studies, critical media literacy, STEM arts based research, STSE education, citizenship education, cultural studies, policy studies, curriculum studies, socio-scientific issues, technology sustainability, food studies, social justice, poverty and consumer behaviour. A wide range of science, technology and environmental educators from Australia, Brazil, Canada, Netherlands and the United States have combined their perspectives to produce this exciting, innovative, timely and important book. It should be essential reading for all teachers, teacher educators and curriculum developers keen to address key issues raised by a commitment to assist students in refining their understanding of what constitutes socially, culturally, ethically and politically responsible consumer practices and supporting them in formulating and engaging in effective individual and collective action. Derek Hodson, Emeritus Professor of Science Education, Ontario Institute for Studies in Education (OISE), University of Toronto; Professor of Science Education at The University of Auckland, New Zealand and Founding Editor of the Canadian Journal of Science, Mathematics and Technology Education (CJSMTE). The authors in the book deconstruct and analyse intricate economic, sociopolitical and affective networks that are behind the cycles of production, distribution and consumption of objects that are present in youngsters' daily lives and their attitudes towards them. Apart from breaking new ground by proposing and discussing socioculturally informed research about the topic, the book connects with pedagogical approaches that value critical perspectives on the nature of the relationship between science, technology, society and environment. It is a must read for both researchers and practitioners interested in issues related to sustainability and citizenship education. Isabel Martins, Professor of Science Education, Universidade Federal do Rio de Janeiro, Federal University of Rio de Janeiro (UFRJ).

Teacherpreneurs Barnett Berry, Ann Byrd, Alan Wieder, 2013-08-12 We need a bold new brand of teacher leadership that will create opportunities for teachers to practice, share and grow their knowledge and expertise. This book is about teacherpreneurs: highly accomplished classroom teachers who blur the lines of distinction between those who teach in schools and those who lead them. These teacherpreneurs embody the concept that teachers can teach as well as lead the transformation of teaching and learning. It's about empowering expert teachers who can buoy the image of teaching and

enforce standards among their ranks while all along making sure that their colleagues as well as education policymakers and the public know what works best for students The book follows a small group of teacherpreneurs in their first year We join their journey toward becoming teacher leaders whose work is not defined by administrative fiat but by their knowledge of students and drive to influence policies that allow them and their colleagues to teach more effectively The authors trace the teacherpreneurs steps and their own in the effort to determine what it means to define and execute the concept of teacherpreneurism in the face of tough demands and resistant organizational structures *Read, Write, Lead* Regie Routman, 2014-06-17 Literacy is a skill for all time for all people It is an integral part of our lives whether we are students or adult professionals Giving all educators the breadth of knowledge and practical tools that help students strengthen their literacy skills is the focus of *Read Write Lead* Drawing on her experience as a mentor teacher reading specialist instructional coach and staff developer author Regie Routman offers time tested advice on how to develop a schoolwide learning culture that leads to more effective reading and writing across the curriculum She explains how every school including yours can implement instructional practices that lead to better engagement and achievement in reading and writing for all students from kindergarten through high school including second language and struggling learners build Professional Literacy Communities of educators working together to create sustainable school change through professional learning based on shared beliefs reduce the need for intervention through daily practices that ensure success even for our most vulnerable learners and embed the language of productive feedback in responsive instruction conferences and observations in order to accelerate learning for students teachers and leaders In their own voices teachers principals literacy specialists and students offer real life examples of changes that led to dramatic improvement in literacy skills and perhaps just as important increased joy in teaching and learning Scattered throughout the book are Quick Wins ideas and actions that can yield positive affirming results while tackling the tough work of long term change

Building the Foundation: Whole Numbers in the Primary Grades Maria G. Bartolini Bussi, Xu Hua Sun, 2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level Accordingly a focus area that is central to the discussion was chosen together with a number of related questions The broad area of Whole Number Arithmetic WNA including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula The study of this core content area is often regarded as foundational for later mathematics learning However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country to country As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well

as an opportunity to learn from the practices of different countries and contexts

Student-Led Assessment Starr Sackstein, 2024-01-03 The single greatest authority on student learning is the student doing the learning but the right structures must be in place for students voices to be clearly heard and truly valued Conventional formative and summative assessment are most often conducted through one size fits all quizzes and tests that yield narrow predetermined categories of data about students academic progress But if we want a truly accurate look at what how and to what extent students are learning who better to consult than the obvious experts on the matter the students themselves In this lively and comprehensive guide veteran teacher and author Starr Sackstein provides the tools needed to help students compile and present evidence of learning through portfolios and student led conferences from templates and rubrics to personal testimonials reflection questions and activities The book features Forms applicable across grade levels and content areas for unpacking standards co constructing success criteria with students evaluating current classroom practices and more Real life perspectives and scenarios from educators in the field who have embraced portfolios and student led conferences over standardized tests and letter grades Practical experience based guidance for building classroom and schoolwide learning cultures that promote both learner agency and academic achievement The resources recommendations and reflections in Student Led Assessment allow educators at all levels to develop systems and protocols for ensuring student ownership of and pride in their own hard won achievement
