Education in Vietnam Martin Hayden, Thi Le Tran,2024-08-02 Offering insights into the current and projected future state of the education system in Vietnam this edited volume is an authoritative sourcebook for scholars policy analysts academic staff and students Vietnam is well on its way to joining the dress circle of high achieving education nations in Asia

International surveys of the academic aptitude and ability of the nation's youth consistently place it well above relevant regional and global averages. This accomplishment is remarkable for a country with a gross domestic product per capita of only US 2 785 in 2020. The dynamics of Vietnam's national education system are comprehensively documented in the book. Each of the country's education sectors is critically appraised as well as the culture of education in Vietnam. Specific issues concerning funding and equity, quality and accreditation, the teaching of curriculum areas, the internationalisation of the system and the provision of educational opportunities for young people with disabilities are carefully analysed against a background of relevant global trends. With contributions from well established and highly respected local experts with high aspirations for the future development of the national education system in Vietnam, this book will be a must read for academics and students of Southeast Asian studies and comparative education.

**Reshaping Graduate Education Through Innovation and Experiential Learning** Jenkins, Toby S., 2020-10-16. Discussions on the importance and impact of pedagogical practice on students as whole persons are often concentrated on the P 12 or undergraduate learning experience. In higher education, many institutions do an outstanding job of complicating the undergraduate classroom to include civic engagement, community based learning, education abroad, social action and project based learning. But what about the graduate classroom? While there are indeed numerous graduate programs that push students to interact with strong, meaningful, difficult and sometimes harsh facts, scholarship and ideologies, the instructional methods have largely remained stagnant. New methods of constructing deep and meaningful learning in graduate education is essential for the transformation and continued evolution of graduate school instruction. **Reshaping Graduate Education Through Innovation and Experiential Learning** is a crucial reference book that offers practice based reflections on efforts to infuse creativity, social action, engaged learning or other creative interventions into the graduate classroom. The book includes personal narratives that are grounded in pedagogical perspectives from graduate school instructors who share their experiences with innovative and transformative teaching practices. The goal of the book is to encourage graduate school professors to engage social justice education as something to be experienced and practiced in their courses and not just as a concept to be studied. As such, the book covers topics such as self directed learning, counseling and community mapping. It is ideal for graduate level instructors in the field of education and other related social science areas as well as junior faculty as they establish a teaching practice or veteran faculty seeking creative transformation.

**Cleaning with Solvents** John Durkee, 2014-03-20. High precision cleaning is required across many sectors including aerospace, defense, medical device manufacturing, pharmaceutical processing, semiconductor electronics and more. In this comprehensive reference work, solvent cleaning equipment is thoroughly covered with a focus on the engineering details of its operation and selection. Key data is provided alongside practical guidance giving scientists and engineers in multiple sectors the information they need not only to choose the correct machine in the first place but also how to operate it effectively and efficiently. Low emission open top vapor degreasers, enclosed machines of the vacuum and

pressurized type cosolvent machines and adsorption of tailpipe emissions are covered in detail and fully illustrated in color This unique book covers material known by designers and manufacturers of solvent cleaning machines but not collected and organized for the benefit of users The comprehensive coverage provided by John Durkee makes this book relevant and timely not only for readers who wish to know more about how solvent cleaning equipment works but also those who are under pressure from environmental regulators or corporate management to find effective alternatives and those engaged in non solvent cleaning operations who are unsatisfied with their cleaning results Clear straightforward explanations of how various types of cleaning solvents should be managed to clean parts Full color hand drawn illustrations and photographs of the important internal sections of solvent cleaning machines Design calculations of operating parameters in solvent cleaning machines
