Normativity and Control David Owens, 2018-01-26 Do we control what we believe Are we

responsible for what we believe These two questions are connected the kind of responsibility we have for our beliefs depends on the form of control that we have over them For a number of years David Owens has investigated what form of control we must have over something in order to be held to the norms governing that thing and has argued that belief intention and action each require a different type of control The forms of freedom appropriate to each of them vary and so do the presuppositions of responsibility associated with each of them Issues in the moral psychology of belief cast light on some of the traditional problems of epistemology and in particular on the problems of scepticism and testimony In this series of ten essays Owens explores various different forms of control we might have over belief and the different forms of responsibility they generate He brings into the picture notable recent work in epistemology on assurance theories of testimony on pragmatic encroachment on the aim of belief and on the value of knowledge He also considers topics in related fields such as the philosophy of mind e g the problem of self knowledge and theories of the first person and the philosophy of action e g the guise of the good and the role of the will in free agency Finally Owens suggests a non standard reading of the sceptical tradition in early modern philosophy as we find it in Descartes and Hume Seven of the essays collected here are previously published one has been heavily revised and two are previously unpublished Owens provides a substantial introduction bringing together the themes of the essays
