Look for a pattern in the data set $\{(-2, 10), (-1, 1), (0, -2), (1, 1), (2, 10)\}$ to determine which kind of model best describes the data.

	Data (1)	Data (2)
+ 1	-2	10
+ 1	-1	1
+ 1	0	-2
+ 1	1	1
+ 1	2	10

Diagram illustrating the data set and the constant ratio of 6 for every constant change of +1 in the x-values.

For every constant change of +1 there is a constant ratio of 6.

For every constant change of +1 there is a constant ratio of 6.

The data appear to be quadratic.

Interactive Operations Research with Maple Mahmut Parlar, 2012-12-06 Interactive Operations Research with Maple Methods and Models has two objectives to provide an accelerated introduction to the computer algebra system Maple and more importantly to demonstrate Maple's usefulness in modeling and solving a wide range of operations research OR problems This book is written in a format that makes it suitable for a one semester course in operations research management science or quantitative methods A number of students in the departments of operations research management science operations management industrial and systems engineering applied mathematics and advanced MBA students who are specializing in quantitative methods or operations management will find this text useful Experienced researchers and practitioners of operations research who wish to acquire a quick overview of how Maple can be useful in solving OR problems will find this an excellent reference Maple's mathematical knowledge base now includes calculus linear algebra ordinary and partial differential equations number theory logic graph theory combinatorics statistics and transform methods Although Maple's main strength lies in its ability to perform symbolic manipulations it also has a substantial knowledge of a large number of numerical methods and can plot many different types of attractive looking two dimensional and three dimensional graphs After almost two decades of continuous improvement of its mathematical capabilities Maple can now boast a user base of more than 300 000 academics researchers and students in different areas of mathematics science and engineering

Mathematical Studies in Management Science, 1965 **Fundamental Concepts in the Design of Experiments** Charles Robert Hicks, 1982 *Extended Linear Chain Compounds* Joel S. Miller, 2012-12-06 Linear chain substances span a large cross section of contemporary chemistry ranging from covalent polymers organic charge transfer complexes to nonstoichiometric transition metal coordination complexes Their commonality which coalesced intense interest in the theoretical and experimental solid state physics chemistry communities was based on the observation that these inorganic and organic polymeric substrates exhibit striking metal like electrical and optical properties Exploitation and extension of these systems has led to the systematic study of both the chemistry and physics of highly and poorly conducting linear chain substances To gain a salient understanding of these complex materials rich in anomalous anisotropic electrical optical magnetic and mechanical properties the convergence of diverse skills and talents was required The constructive blending of traditionally segregated disciplines such as synthetic and physical organic inorganic and polymer chemistry crystallography and theoretical and experimental solid state physics has led to the timely development of a truly interdisciplinary science This is evidenced in the contributions of this monograph series Within the theme of Extended Linear Chain Compounds experts in important but varied facets of the discipline have reflected upon the progress that has been made and have cogently summarized their field of specialty Consequently up to date reviews of numerous and varied aspects of extended linear chain compounds has developed Within these volumes numerous incisive contributions covering
