1. a. The table shows the value of a car, in thousands of dollars, each year after it was purchased. Plot the data values, and find a line that fits the data.

| age (years) | value (thousands of dollars) |
|-------------|------------------------------|
| 0           | 30.0                         |
| 1           | 22.5                         |
| 2           | 19.0                         |
| 3           | 16.0                         |
| 4           | 13.5                         |
| 5           | 11.4                         |

- b. Write an equation for the linear function,  $C$ , that gives the value of the car, in thousands of dollars, when its age is  $t$  years.
- c. What does  $C(6)$  mean in this situation? What is the value of  $C(6)$ ?
- d. In this situation, what does the solution to the equation  $C(t) = 2$  tell us? Find that solution.
- e. Write an equation that would allow us to find the age of the car when we know  $C(t)$ .
