

HOW RED WINE IS MADE

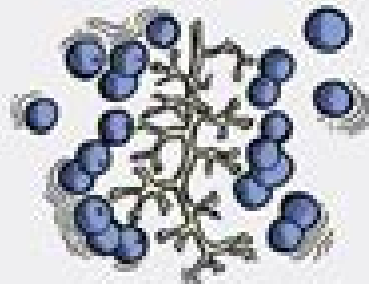

The only range of wine-making equipment in the world that's designed for the home

Harvest grapes

The vintage (harvest) starts in late August and it's done by hand or machine. Generally speaking, red wine grapes are harvested in the autumn from white wine grapes.

Prepare grapes

Grapes are washed and destemmed. Some wineries ferment whole clusters to add flavour. The result is a complex wine with more body. Most winemakers, and home brewers, remove the stems for a cleaner wine.

Clarification

Clarifying or "fining" agents such as egg whites or vegetable protein are added to the wine. These bind particles together to allow the sediment to settle. Some wines are still unfiltered and unfined.

Press

After the fermentation process, the liquid is pressed out of the skins and seeds. The skins and seeds are left to dry, becoming "pomace".

Fermentation

Grapes are left to ferment in the barrel for several days. The liquid is then transferred to a larger barrel or tank. The result is the wine, which is then bottled.

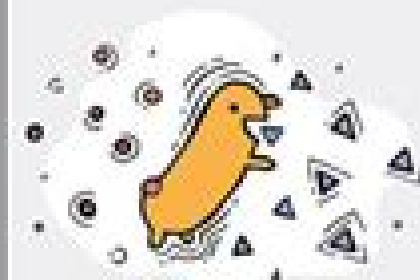

Add yeast

Yeast is added to the wine to start the fermentation process. The yeast is added in the form of a packet or a small amount of yeast. The wine is then left to ferment for several days.

Bottling

Bottling is done with care to ensure the wine is not contaminated. The bottles are sealed and the wine is then left to age.

Malolactic

As wine matures, it can undergo a process called malolactic fermentation. This is where the malic acid in the wine is converted into lactic acid, which gives the wine a softer, more rounded flavour.

Aging

Red wine is often aged in barrels for several months or even years. This allows the wine to develop a more complex flavour and a smoother texture.

Blending

The winemaker blends the wine from different barrels to create a balanced and harmonious wine. This is done by tasting the wine from each barrel and combining them in the right proportions.

Bottle aging

Some wines are aged in the bottle for several years before being released. This allows the wine to develop a more complex flavour and a smoother texture.
