Rule,2000 With the advent of the National Gambling Act no 33 of 1996 the legislative environment with regards to gambling changed dramatically *International Journal for the Study of Southern African Literature and Languages* ,2005 **Monitoring the Quality of Education in Schools** Vanessa Scherman,Roel J. Bosker,Sarah J. Howie,2016-12-27 The monitoring of quality has been part of the educational landscape for many decades Originally the need to monitor arose as part of an economic process whereby policy makers wanted to discern the return on investment in education This bottom line thinking while still prominent has receded into the background in light of global changes and the emergence of a global economy Now in addition to the question what is the return on investment the more important question is are the students in schools ready to participate in

the economy of a 21st century society This is underpinned by the inquiry into what knowledge and competencies are required for students to participate meaningfully in nation building This inquiry can only be undertaken by means of monitoring evaluating where the students are and what is required so that students reach their potential In an ever changing technologically oriented world the manner in which competencies and knowledge are identified and how these need to be measured and identified is important In this book the theory and practice of underpinning the monitoring of the quality of education is described This is followed by a number of practical examples in the form of country case studies on how theory plays out in practice The book further provides common themes across developed and developing emerging economies underscoring the need for approaches which are locally relevant but internationally transferable *African Schools as Enabling Spaces* Vanessa Scherman,Linda Liebenberg,2023-03-31 Using African schools as case studies this book presents an implementation framework that can be used by schools internationally to drive social change and support their role as enabling spaces allowing learners to thrive Recognising the increase in demands violent conflicts lack of stability and social strain prevalent within the current African school system this book covers the challenges that negatively impact children s development by understanding and presenting a framework that ensures a holistic social and educational support system can be created for students Featuring contributions from a broad range of leading scholars the book ultimately addresses the critical need in academic and practice research for the importance of schools in building civil societies Arguing for the importance of schools as places of stability social inclusivity and communities of care this book will have direct relevance to academics researchers and post graduate students in the field of education policy international and comparative education and character education Those working in school leadership management and administration environments will also benefit from this volume **Canadiana** ,1988-03 Translanguaging, Coloniality and Decolonial Cracks Robyn Tyler,2023-01-13 In this linguistic ethnography of bilingual science learning in a South African high school the author connects microanalyses of classroom discourse to broader themes of de coloniality in education The book challenges the deficit narrative often used to characterise the capabilities of linguistically minoritised youth and explores the challenges and opportunities associated with leveraging students full semiotic repertoires in learning specific concepts The author examines the linguistic landscape of the school and the beliefs and attitudes of staff and students which produce both coloniality and cracks in the edifice of coloniality A critical translanguaging lens is applied to analyse multilingual and multimodal aspects of students science meaning making in a traditional classroom and a study group intervention Finally the book suggests implications for decolonial pedagogical translanguaging in Southern multilingual classrooms **National Union Catalog** , Includes entries for maps and atlases **The Crosslinguistic Study of Language Acquisition** Dan Isaac Slobin,2013-05-13 See Volume I 0 89859 367 0 for full description and TOC Language and Sustainable Development Lisa J. McEntee-Atalianis,Humphrey Tonkin,2023-03-03 This book addresses the importance of language in matters of sustainability and incorporating such

concerns in implementing the UN's Sustainable Development Goals (SDGs). Sustainable language policy must aim to include all groups, including language minorities and marginalized populations such as refugees and aid recipients, in conditions that allow for their inclusion in making and implementing policy. The book brings together nine studies covering such topics as language and digital resources, sustainable and inclusive multilingual education, national language policy, and language in peacekeeping operations. A final chapter addresses the crucial intersection between sociolinguistics and economics and the implications of this for development and the SDGs.
