2.1 Read the passage below and answer the questions that follow.

Peat lands are special wetlands that play a very important role in ecology. A peat land, of approximately 5 000 years old, near Mulhang is almost destroyed because of excessive extraction of water from the nearby Molojo river. The water is extracted for human consumption.

Peat lands like the one near Malling is exceptional and play an important role in storing water as well as preventing climate changes.

Dr. Pat-Louis Drunding said that carbon that is "held" or "stored" by peat lands combats climate change because it decreases the amount of carbon in the atmosphere.

Peat lands trap about one third of the world's carbon. Approximately 50% of wetlands worldwide are peat lands. However in South Africa about 10% of the wetlands are peat lands.

Grundling explained that peat lands can hold about 1 000 times its own mass in water. This replenishes the water table and is the source that keeps streams flowing. The "sponge effect" of the peat also makes it possible to store water that is then released during the seasons.

Dr. Grunwald said that it might be too late to restore the peat land near Malling, but it might be possible to restore some parts of it if more water is supplied to this peat land.

The result of this destruction is depletion of the water table. The habitat of numerous fish and bird species that lived in the canal bed was also destroyed.

The Omega Principle Paul Greenberg, 2018-07-10 By the bestselling author of *Four Fish* and *American Catch* an eye opening investigation of the history science and business behind omega 3 fatty acids the miracle compound whose story is intertwined with human health and the future of our planet Omega 3 fatty acids have long been celebrated by doctors and dieticians as key to a healthy heart and a sharper brain In the last few decades that promise has been encapsulated in one of America's most popular dietary supplements Omega 3s are today a multi billion dollar business and sales are still growing apace even as recent medical studies caution that the promise of omega 3s may not be what it first appeared But a closer look at the omega 3 sensation reveals something much deeper and more troubling The miracle pill is only the latest product of the reduction industry a vast global endeavor that over the last century has boiled down trillions of pounds of marine life into animal feed fertilizer margarine and dietary supplements The creatures that are the victims of that industry seem insignificant to the untrained eye but turn out to be essential to the survival of whales penguins and fish of all kinds including many that we love to eat Behind these tiny molecules is a big story of the push and pull of science and business of the fate of our oceans in a human dominated age of the explosion of land food at the expense of healthier and more sustainable seafood of the human quest for health and long life at all costs James Beard Award winning author Paul Greenberg probes the rich and surprising history of omega 3s from the dawn of complex life when these compounds were first formed to human prehistory when the discovery of seafood may have produced major cognitive leaps for our species and on to the modern era when omega 3s may point the way to a bold new direction for our food system With wit and boundless curiosity Greenberg brings us along on his travels from Peru to Antarctica from the Canary Islands to the Amalfi Coast to reveal firsthand the practice and repercussions of our unbalanced way of eating Rigorously reported and winningly told *The Omega Principle* is a powerful argument for a more deliberate and forward thinking relationship to the food we eat and the oceans that sustain us

Malaysian Media Studies: Integrating Perspectives (UM Press) Azizah Hamzah, Amira Firdaus, 2016 This edited volume revisits developments in the field of media education and media studies at a time when society is experiencing a ubiquitous networked digital media environment Rapid advances in media and communication technologies and the accompanying developments in social cultural political and economic realms pose unexpected challenges to the curricula of long established media and communication schools As opposed to rigidly structured nation based mass media systems of the past century the new global media sphere celebrates the breaking down of borders whether spatial cultural or social Today in the second half of the second decade of the 21st century this problem translates into what and how to teach students of media who in all likelihood are more adept media consumers and producers than their teachers In a region where educational institutions and educators don't transform as fast as media technologies do there is a need to problematize and to reflect upon the situation This edited volume examines critical issues related to media studies at local institutions of higher

learning and includes a sampling of research charting new directions in local media scholarship Contributions to this edited volume reflect the shared concerns of media educators and researchers in Malaysia and two neighboring countries Indonesia and Thailand Three main themes underscore this volume reflecting their importance to the evolution of media education and to a certain extent research as well Historical development of media education and training Current developments and future trajectories of media education in a globalized digital media environment Analysis of media and society **Scientific and Technical Aerospace Reports** ,1978 *Soil to Foil* Saleem Ali,2023-05-23 Aluminum is the most abundant metal in the earth's crust It is also ubiquitous in the modern world from aircraft to soda cans A dizzying number of consumer and industrial products employ aluminum typically alloyed because of its availability versatility and malleability Today how efficiently we use and reuse aluminum is vital to addressing key environmental challenges and understanding humanity's fraught relationship with the earth *Soil to Foil* tells the extraordinary story of aluminum Saleem H Ali reveals its pivotal role in the histories of scientific inquiry and technological innovation as well as its importance to sustainability He offers compelling portraits of the scientists and innovators who discovered new uses for this remarkable element ranging from chemistry and geoscience to engineering and industrial design Ali argues that aluminum exemplifies broader lessons about stewardship of nonrenewable resources its seeming abundance has given rise to wasteful and destructive practices *Soil to Foil* follows aluminum's path along the supply chain from extraction to production consumption to recycling Ali explores the ecological damage at mine sites and visits affected communities seeking to restore the land He foregrounds the possibilities for more sustainable industrial practices emphasizing how product design can incorporate eventual reuse and recycling Ultimately *Soil to Foil* shows that the story of aluminum's use and misuse helps us rethink how to sustainably manage the resources of our planet **PISA 2015 Assessment and Analytical Framework Science, Reading, Mathematic, Financial Literacy and Collaborative Problem Solving** OECD,2017-08-31 What is important for citizens to know and be able to do The OECD Programme for International Student Assessment PISA seeks to answer that question through the most comprehensive and rigorous international assessment of student knowledge and skills **PISA 2015 Assessment and Analytical Framework Science, Reading, Mathematic and Financial Literacy** OECD,2016-04-19 What is important for citizens to know and be able to do The OECD Programme for International Student Assessment PISA seeks to answer that question through the most comprehensive and rigorous international assessment of student knowledge and skills
