Decentring in Higher Education and Research Heidi Bojsen,Petra Daryai-Hansen,Anne Holmen,Karen Risager,2023-01-13

Using data from multilingual settings in universities and adjacent learning contexts in East Asia North Africa Central and

North America and Europe this book provides examples of the heuristic value of translanguaging and epistemological

decentring Despite this and other theoretical and empirical work and ever stronger calls for the inclusion of other languages

epistemologies and constructions of culture in higher education decentring and translanguaging practices are often

relegated to the margins or suppressed in research and education because of the organisational structures of education

institutions and prevailing language norms policies and ideologies The authors draw on research on pluri and multilingualism

within education studies as well as post and decolonial theoretical contributions to the research on the role of language in

education and knowledge production to provide evidence that decentring cannot happen until learners have been given the

tools to identify which sorts of centring dynamics and conditions are salient to their learning and trans languaging
