Introduction to SAP Multi Bank Connectivity, MBC Connector functionality and configuration. Implementation steps and best practices. Situation Handling functionality in SAP S/4HANA. Pro SAP Scripts, Smartforms, and Data Migration Sushil Markandeya, 2017-12-01 Master SAP scripts, Smartforms and data migration with hands-on exercises. The information provided in this book will help you decode the complexities and intricacies of SAP ABAP programming. Pro SAP Scripts, Smartforms and Data Migration begins by describing the components of a SAP script form, styles and standard texts. It then shows you how an ABAP program can invoke a SAP script form and send data to the form to provide output. You will then apply these concepts to hands-on exercises covering real business scenarios. These scenarios include creating a custom form from scratch to output purchase orders. Smartforms will then be introduced as an enhanced tool to output business documents. The book will show you how to apply the concepts of Smartforms to real-world problems. The data migration material includes details of the Legacy System Migration Workbench (LSMW). This is introduced as a platform from which every data migration task can be performed, minimizing or eliminating programming. What You Will Learn: Create and deploy SAP script forms and related objects; Modify a copy of a SAP-supplied SAP script form, configure it and deploy it according to transaction code ME22N; Build Smartforms forms and deploy them; Carry out data migration using the batch input and call transaction methods; Perform data migration using all four methods available in LSMW; Modify a copy of a SAP-supplied Smartforms form, configure it and deploy it according to transaction code NACE. Who This Book Is For: Readers new to SAP ABAP programming, close to three years of experience or less are the primary target audience for this book. Intermediate users can also utilize this book as a reference source. SAP ABAP Sushil Markandeya, Kaushik Roy, 2014-11-17 SAP ABAP Advanced Business Application Programming offers a detailed tutorial on the numerous features of the core programming platform used for development for the entire SAP software suite. SAP ABAP uses hands-on, business-oriented use cases and a valuable dedicated e-resource to demonstrate the underlying advanced concepts of the OO ABAP environment and the SAP UI. SAP ABAP covers the latest version NetWeaver 7.3 and SAP application programming release 6.0 of the platform for

demonstrating the customization and implementation phases of the SAP software implementation. Void of theoretical treatments and preoccupation with language syntax, SAP ABAP is a comprehensive practical one-stop solution which demonstrates and conveys the language's commands and features through hands-on examples. The accompanying e-resource is a take-off point to the book. SAP ABAP works in tandem with the accompanying e-resource to create an interactive learning environment where the book provides a brief description and an overview of a specified feature command, showing and discussing the corresponding code. At the reader's option, the user can utilize the accompanying e-resource where a step-by-step guide to creating and running the feature's object is available. The presentation of the features is scenario-oriented, i.e., most of the features are demonstrated in terms of small business scenarios. The e-resource contains the scenario descriptions, screen shots, detailed screen-cams, and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature command are conveyed through execution of these hands-on programs. Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration objects, including the programs, rely on some of the SAP application tables being populated, for example, an IDES system which is now a de facto system for all SAP training-related activities.
