Mathematics in Service to the Community Charles Robert Hadlock,2005 Publisher description This book looks at the wide variety of ways in which math statistics and math education teachers have incorporated service learning into their courses These projects are not just stand alone community service initiatives but rather they specifically target the improvement of mathematics skills and insights of the college students in the courses with which they are associated In some cases the projects are the major focus of the courses In others they may range from an essential component to one of several options The book also speculates about heretofore untapped possibilities for service learning even including courses in pure mathematics College faculty often may not fully appreciate the wide range of support mechanisms for such ventures even within their own institutions so the book includes a lengthy chapter on the details of converting a rough idea to a solid action plan sometimes even picking up financial support and other often unexpected benefits along the way Creative teachers rarely implement a project in exactly the same way as a colleague might have so the emphasis here is to display a wide range of successful projects in order to encourage readers to develop some of their own

Models of Secondary Education and Social Inequality Hans-Peter Blossfeld,Sandra Buchholz,Jan Skopek,Moris Triventi,2016-11-25 From an international comparative perspective this third book in the prestigious eduLIFE Lifelong Learning series provides a thorough investigation into how social inequalities arise during individuals secondary schooling careers Paying particular attention to the role of social origin and prior performance it focuses on tracking and differentiation in secondary schooling examining the short and long term effects on inequality of opportunities It looks at ways in which differentiation in secondary education might produce and reproduce social inequalities in educational opportunities and educational attainment The international perspective allows illuminating comparison in light of the different models rules and procedures that regulate admission selection and learning in different countries

Mathematics for Social Justice Catherine A. Buell,Bonnie Shulman,2021-11-18 Mathematics instructors are always looking for ways to engage students in meaningful and authentic tasks that utilize mathematics At the same time it is crucial for a democratic society to have a citizenry who can critically discriminate between fake and reliable news reports involving numeracy and apply numerical literacy to local and global issues This book contains examples of topics linking math and social justice and addresses both goals There is a broad range

of mathematics used including statistical methods modeling calculus and basic algebra The range of social issues is also diverse including racial injustice mass incarceration income inequality and environmental justice There are lesson plans appropriate in many contexts service learning courses quantitative literacy reasoning courses introductory courses and classes for math majors What makes this book unique and timely is that the most previous curricula linking math and social justice have been treated from a humanist perspective This book is written by mathematicians for mathematics students Admittedly it can be intimidating for instructors trained in quantitative methods to venture into the arena of social dilemmas This volume provides encouragement support and a treasure trove of ideas to get you started The chapters in this book were originally published as a special issue of the journal PRIMUS Problems Resources and Issues in Mathematics Undergraduate Studies Service-Learning to Advance Access & Success Travis T. York, Alan S. Tinkler, Barri E. Tinkler, 2018-11-01

Throughout the 90s and early 2000s service learning research was intensely focused on the student outcomes That body of research has effectively brought service learning from the fringes into the mainstream of institutionalized pedagogies In the past decade service learning research has experienced an infusion of exploration in three distinct ways first large scale quantitative methodologies second a proliferation of research that has explored how different sub groups of students experience the pedagogy differently thusly resulting in variation among outcomes and third a focus on the experiences and outcomes associated for communities and community partners engaged in service learning In an effort to support these movements this volume of the Advances in Service Learning Research series Service Learning to Advance Access Success Bridging Institutional and Community Capacity focuses on how service learning can advance access and success Not simply access and success of students but the ways that service learning can advance access and success for all through bridging institutional and community capacity building The chapters in this volume serve as a testament to the ways in which service learning research continue to be advanced by thoughtful scholar practitioners The 12 chapters included in this volume are organized into three sections The first section focuses on how institutional and community partnerships can be leveraged to build community capacity The second section focuses on how institutions might build their own capacity to effect change for the good of society The third and final section focuses on six studies exploring the relationship service learning pedagogy has with access and success for students Of the six studies three are situated within the context of teacher preparation programs
