effectively challenged Told by a senior manager that this is a logistics business Bosworth documents how the public and private sectors have built a supply chain in which people's humanity is transformed both symbolically and tangibly through administrative processes and bureaucracy into monetized measurable units Like all logistics the system has failure built into it The contract does not seek to eradicate risk but rather to manage it determining responsibility and apportioning a financial value to such failures as delay escape aborted flight or death in custody Front line workers and managers depoliticise and normalise their efforts by casting their duties in familiar bureaucratic terms with targets service level agreements and key performance indicators Focusing on first hand accounts from workers and lengthy observation and document analysis Bosworth explores the impact of border logistics in order to ask what it would take to build inclusive infrastructures rather than those designed to exclude
