**LEARNING ACTIVITY SHEET 4b**  
**Mathematics 6 – Solving Routine and Non-Routine Problems**  
**involving Addition and Subtraction of Decimals**

**I. Introduction**

Think about that day when your favorite clothing brand announces they will be having a sale and all the items will only costs ₱ 299.99.

Do you remember that thrilling summer and how happy you are when SM City Clark held a 3-day sale?

Well, you probably don't realize it but decimals actually influence our lives in more ways than we can imagine. Most people have the tendency to buy or acquire things if they see a decimal point in the price simply because we automatically think that ₱ 99.99 is a lot way cheaper than paying ₱100. Why? Because that is just how our mind works.

**II. Learning Competency**

This Learning Activity Sheets was designed and written with you in mind. It is here to help you understand the real world and further develop your problem-solving skills and critical thinking skills. (M6NS - 1d -108.2)

**III. Objectives**

After going through this Learning Activity Sheets, you are expected to:

1. Solve 1 or more steps routine and non-routine problems involving addition and or subtraction of decimals and mixed decimals using appropriate problem-solving strategies and tools.
2. Tell the steps in problem solving and write the answers correctly.
