

20. What are the women doing with saliva and hair samples?
They are checking out the genetic fingerprint of their boyfriends to see what kind of "catch" they have made in a date, or mate.
21. What does Irene read on the printout?
Irene reads Jerome's genetic fingerprint and thinking that it is Vincent's, concludes that he is "quite a catch."
22. What DNA source incriminates Vincent?
The inspector finds an eyelash that belongs to Vincent in GATTACA.
23. Who does the crime investigator turn out to be?
The crime investigator turns out to be Anton, Vincent's brother.
24. How is Vincent finally exposed at the GATTACA spaceport?
Seconds before his flight, Vincent is asked to take a final urine test. He fails the test because he did not carry along a urine pouch with Jerome's urine.
25. Why does the doctor let him through anyway?
The doctor has a son that was not genetically what he should have been. The doctor tells Vincent that the doctor's son admires Vincent. The doctor seems to understand Vincent's dream and ambition. The doctor hints that he's known about, or been suspicious about Vincent because the doctor has been witness to Vincent's urine tests: "Right handed-men don't hold it with their left."

CONNECTIONS-SCIENCE FICTION TO FACT

1. There are many hidden meanings in the words used in this film.
What does the word GATTACA mean?
The letters are taken from the letters that represent the four nitrogenous DNA bases: A adenine, T thymine, G guanine, C cytosine.
2. How about the name Eugene? (Hint: what other biology words start with "eu?")
The name Eugene can refer to eugenics, which is the science of improvement of the human race through the application of genetics. Other biology words that start with "eu" are: eukaryotic (having a true nucleus), euchromatin (active genes), euglena (both plant and animal), and eustachian tube (the auditory canal). The root "eu" in biology means "true."
3. After watching this film, how do you think genetic screening today might affect a person's ability to get a job, or get health insurance? Explain.
If a genetic disease is discovered, it could result in higher premiums for health insurance, denial of claims because of a pre-existing condition, or denial of health insurance. Some employers may not hire people that might have a disease that results in poor attendance or becoming disabled. Some employers may not hire people they deem to be a safety risk to themselves, or the public.

Am I My Genes? Robert L. Klitzman M.D., 2012-03-01 In the fifty years since DNA was discovered we have seen extraordinary advances For example genetic testing has rapidly improved the diagnosis and treatment of diseases such as Huntington s cystic fibrosis breast cancer and Alzheimer s But with this new knowledge comes difficult decisions for countless people who wrestle with fear about whether to get tested and if so what to do with the results *Am I My Genes* shows how real individuals have confronted these issues in their daily lives Robert L Klitzman interviewed 64 people who faced Huntington s Disease breast and ovarian cancer or Alpha 1 antitrypsin deficiency The book describes often in the person s own words how each has wrestled with the vast implications that genetics has for their lives and their families Klitzman shows how these men and women struggle to make sense of their predicament and its causes They confront a series of quandaries whether to be tested whether to disclose their genetic risks to parents siblings spouses offspring friends doctors insurers employers and schools how to view and understand themselves and their genetics what treatments if any to pursue whether to have children adopt screen embryos or abort and whether to participate in genetic communities In the face of these uncertainties they have tried to understand these tests and probabilities avoid fatalism anxiety despair and discrimination and find hope meaning and a sense of wholeness Forced to wander through a wilderness of shifting sands they chart paths that many others may eventually follow Klitzman captures here the voices of pioneers some of the first to encounter the personal dilemmas introduced by modern genetics *Am I My Genes* is an invaluable account of their experience one that will become all the more common in the coming years An extraordinary exploration probing the many roles and implications of genetics in our lives today Filled with astonishing insights this riveting book is vital reading for us all Paula Zahn Klitzman lucidly discusses the moral and psychological complexities that come in the wake of genetic testing An important book for anyone who has the genes for pathology which is all of us and I recommend it highly Kay Redfield Jamison author of *An Unquiet Mind* An illuminating voyage through the medical familial and existential quandaries faced by those of us at genetic risk Thomas H Murray President and CEO The Hastings Center

Human Purpose and Transhuman Potential Ted Chu, 2014-03-01 For millennia great thinkers have contemplated the meaning and purpose of human existence but while most assumed that humanity was the end point of creation or the pinnacle of evolution Ted Chu makes the provocative claim

that the human race may in fact be a means rather than an end that humankind will give rise to evolutionary successors In this wide ranging and authoritative work Chu reexamines the question of human purpose in light of the extraordinary developments of science and technology Arguing that a deep understanding of our place in the universe is required to navigate the magnitude of the choices that lie ahead he surveys human wisdom from both East and West traces the evolutionary trajectory that has led to this point and explores the potentials emerging on the scientific frontier The book addresses the legitimate fears and concerns of playing God but embraces the possibility of transcending biological forms and becoming or creating entirely new life forms

Question Authority; Think for Yourself Beverly A. Potter,Mark James Estren,2022-01-10 We have freedom of speech but we re afraid to speak Our lives have become subjected to PC tyranny a constant fear of offending someone We think that we are independent and that it is the other guy who is influenced brain washed duped persuaded We feel like we think for ourselves How can we feel otherwise There s no way to know because countless influences and interactions have molded us We re members of various groups circles of friends family professional groups hobby group and workplace groups Groups have a way of developing a view that it imposes with a kind of group think We want to belong to be liked and included so go along and get along We don t make waves by questioning If we have a different view we keep it to ourselves Why rock the boat Thinking for yourself is not so easy When encountering an argument to a long held opinion or a wild idea we use critical thinking to evaluate it as we were taught to do in school The problem is that critical thinking is critical It focuses our thinking on the negative what doesn t work what s wrong with the idea and encourages my side thinking where we evaluate evidence in a way that favors our beliefs and entraps us into closed mindedness Thinking for yourself requires open mindedness Open mindedness is being receptive and when the issue is important calls for actively searching for evidence against your beliefs Thinking is not driven by answers but by questions Every intellectual field is born out of a cluster of questions to which

answers are needed Had no questions been asked by those who laid the foundation for a field for example Physics or Biology the field would never have been developed We define tasks express problems and delineate issues with questions Answers signal an end point and stop thought except when an answer generates a further question Timothy Leary said to think for yourself you must question authority To think you must question To think through or rethink anything one must ask questions that stimulate thought The quality of your questions determines the quality of your thinking Thinking begins within some content when questions are generated No questions equals no understanding To engage in thinking through your content you must stimulate your thinking with questions that lead to further questions Our own opinions is one authority we should frequently question Times change We change Perspectives and values change Book explores how opinions and values we held in the past need periodic evaluation and challenge Independent thinkers evolve and need to shed the shackles of old views and opinions Ridicule is the strongest weapon for pressing us to conform It is a kind of bait that if you go for it will entrap you in an argument you can't win and leave you looking ridiculous and deflated Question Authority Think for Yourself offers techniques with examples of how to deflect attacks side tracks and put downs If you've bitten your tongue and later wished you'd spoken up and not been cowed into silence by a mocking co worker when you revealed a politically incorrect viewpoint you'll find much of interest in Question Authority Think for Yourself
