GCSE Computing Key Concept

MySQL
Creating databases and tables

Creating databases in MySQL:

CREATE DATABASE database-name;
SHOW DATABASES;

Creating tables:

USE DATABASE database-name;
CREATE TABLE table-name;
SHOW TABLES;
EXPLAIN TABLE table-name;

```
mysql> SHOW DATABASES;

| Database            |

| information_schema  |
| mysql               |
| performance_schema  |
| u1semansports       |

4 rows in set (0.00 sec)
```

The SQL query to create a brand new database uses the SQL keywords CREATE DATABASE followed by your choice of name for the database;

The SQL query to check the existence of databases uses the SQL keyword SHOW DATABASE;

When creating a table, MySQL needs to know the column name and the data type:

```
CREATE TABLE table-name
-> (entity 1    data type,
-> entity 2    data type,
-> entity 3    data type,
-> );
```

```
mysql> USE u1semansports;
Database changed
mysql> SHOW TABLES;

| Tables_in_u1semansports |

| productlist             |

1 row in set (0.00 sec)

mysql> EXPLAIN productlist;

| Field   | Type          | Null | Key | Default | Extra |

| id      | int(11)       | YES  |     | NULL    |       |
| product | text          | YES  |     | NULL    |       |
| price   | decimal(6,2)  | YES  |     | NULL    |       |

3 rows in set (0.00 sec)
```

Gcse Computing A452 Encryption:

The Standard Data Encryption Algorithm Harry Katzan,1977   *Simple Steps to Data Encryption* Peter Loshin,2013-04-30 Everyone wants privacy and security online something that most computer users have more or less given up on as far as their personal data is concerned There is no shortage of good encryption software and no shortage of books articles and essays that purport to be about how to use it Yet there is precious little for ordinary users who want just enough information about encryption to use it safely and securely and appropriately WITHOUT having to become experts in cryptography Data encryption is a powerful tool if used properly Encryption turns ordinary readable data into what looks like gibberish but gibberish that only the end user can turn back into readable data again The difficulty of encryption has much to do with deciding what kinds of threats one needs to protect against and then using the proper tool in the correct way It s kind of like a manual transmission in a car learning to drive with one is easy learning to build one is hard The goal of this title is to present just enough for an average reader to begin protecting his or her data immediately Books and articles currently available about encryption start out with statistics and reports on the costs of data loss and quickly get bogged down in cryptographic theory and jargon followed by attempts to comprehensively list all the latest and greatest tools and techniques After step by step walkthroughs of the download and install process there s precious little room left for what most readers really want how to encrypt a thumb drive or email message or digitally sign a data file There are terabytes of content that explain how cryptography works why it s important and all the different pieces of software that can be used to do it there is precious little content available that couples concrete threats to data with explicit responses to those threats This title fills that niche By reading this title readers will be provided with a step by step hands on guide that includes Simple descriptions of actual threat scenarios Simple step by step instructions for securing data How to use open source time proven and peer reviewed cryptographic software Easy to follow tips for safer computing Unbiased and platform independent coverage of encryption tools and techniques Simple descriptions of actual threat scenarios Simple step by step instructions for securing data How to use open source time proven and peer reviewed cryptographic software Easy to follow tips for safer computing Unbiased and platform independent coverage of encryption tools and techniques **Maintenance Testing for the Data Encryption Standard** Jason Gait,1980   **Validating the Correctness of Hardware Implementations of the NBS Data Encryption Standard** Jason Gait,1980   Computer Security and the Data Encryption Standard ,1978   *Cryptography* Carl H.
