Low-Altitude Air Delivery Johann C. Dauer,2021-11-02 This book investigates Unmanned Aircraft Systems UAS with a
payload capacity of one metric ton for transportation The authors provide a large variety of perspectives from economics to
technical realization With the focus on such heavy lift cargo UAS the authors consider recently established methods for
approval and certification which they expect to be disruptive for unmanned aviation In particular the Specific Operations
Risk Assessment SORA and its impact on the presented technological solutions and operational concepts are studied Starting
with the assumption of an operation over sparsely populated areas and below common air traffic diverse measures to further
reduce operational risks are proposed Operational concepts derived from logistics use cases set the context for an in depth
analysis including aircraft and system design safe autonomy as well as airspace integration and datalinks Results from
simulations and technology demonstrations are presented as a proof of concept for solutions proposed in this book **Sport**
