Jsc 2011 Math Question:

Teaching Mathematics Using Popular Culture Elana Reiser, 2015-10-29 Mathematics teachers often struggle to motivate their students. One way to cultivate and maintain student interest is for teachers to incorporate popular media into their methodology. Organized on the subject strands of the Common Core, this book explores math concepts featured in contemporary films and television shows and offers numerous examples high school math teachers can use to design lessons using pop culture references. Outlines for lessons are provided along with background stories and historical references.

When Biospheres Collide: A History of NASA's Planetary Protection Programs Michael Meltzer, 2012-01-27 PRINT
FORMAT ONLY NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price. This new book from the NASA History Series tackles an interesting duo of biological problems that will be familiar to anybody who has seen photos of Apollo astronauts quarantined after their return to Earth. Namely, how do we avoid contaminating celestial bodies with Earthly germs when we send spacecraft to study these bodies and how do we avoid spreading foreign biological matter from space when our robotic and human spacefarers return to Earth. Biological matter from an external system could potentially cause an unchecked epidemic either on Earth or in space, so strict precautions are necessary. Each time a space vehicle visits another world, it runs the risk of forever changing that extraterrestrial environment. We are surrounded on Earth by a multitude of different microorganisms, and if some of these hitchhike onboard a space mission, they could contaminate and start colonies on a different planet. Such an occurrence would irrevocably alter the nature of that world, compromise all future scientific exploration of the body, and possibly damage any extant life on it. By inadvertently carrying exotic organisms back to Earth on our spacecraft, we also risk the release of biohazardous materials into our own ecosystem. Such concerns were recognized by scientists even before the 1957 launch of Sputnik. This book presents the history of planetary protection by tracing the responses to the above concerns on NASA's missions to the Moon, Mars, Venus, Jupiter, Saturn, and many smaller bodies of our solar system. The book relates the extensive efforts put forth by NASA to plan operations and prepare space vehicles that return exemplary science without contaminating the biospheres of other worlds or our own. To protect irreplaceable environments, NASA has committed to conducting space exploration in a manner that is protective of the bodies visited as well as of our own planet.

The Political Economy of Education in South Asia John Richards, Manzoor Ahmed, Md. Shahidul Islam, 2021-12-23 With the exception of Sri Lanka South Asian countries have not achieved quality basic education an essential measure for escaping poverty inequality and social exclusion. In *The Political Economy of Education in South Asia* John Richards, Manzoor Ahmed and Shahidul Islam emphasize the importance of a dynamic system for education policy. *The Political Economy of Education in South Asia* documents the weak core competency reading and math outcomes in government primary schools in India, Pakistan, Bangladesh and Nepal and the consequent rapid growth of non-government schools over the last two decades. It compares the training, hiring and management of teachers in South Asian schools to successful national systems ranging from Singapore to Finland. Discussing reform options, it makes the case public good and public priorities are better served when both public and non-government providers come under a strong public policy and accountability framework. *The Political Economy of Education in South Asia* draws on the authors' broad engagement in education research and practice in South Asia as well as analysis by prominent professors of education and NGO leaders to place basic education in a broad context and make the case that universal literacy and numeracy are necessary foundations for economic growth
