Le Monde La Vie:

Life M. Kronegger, Anna-Teresa Tymieniecka, 2012-12-06 In her Introduction Tymieniecka states the core theme of the present book sharply Is culture an excess of nature s prodigious expansiveness an excess which might turn out to be dangerous for nature itself if it goes too far or is culture a natural congenial prolongation of nature life If the latter then culture is assimilated into nature and thus would lose its claim to autonomy its criteria would be superseded by those of nature alone Of course nature and culture may both still be seen as being absorbed by the inner powers of specifically human inwardness on which view human being caught in its own transcendence becomes separated radically in kind from the rest of existence and may not touch even the shadow of reality except through its own prism Excess therefore or prolongation And on what terms The relationship between culture and nature in its technical phase demands a new elucidation Here this is pursued by excavating the root significance of the multiple rationalities of life In contrast to Husserl who differentiated living types according to their degree of participation in the world the phenomenology of life disentangles living types from within the onto-poietic web of life itself The human creative act reveals itself as the Great Divide of the Logos of Life a divide that does not separate but harmonizes thus dispelling both naturalistic and spiritualistic reductionism **Contemporary France**

 how and why internationalisation affects national economic institutions It confronts questions at the heart of debates in
 political economy and comparative politics What does internationalisation of markets mean Who are its carriers in domestic
 arenas Through which mechanisms does it affect decisions about national institutional reform What are institutional
 outcomes in the face of internationalisation The book responds to its questions by looking at key economic institutions in five
 strategic sectors securities trading telecommunications electricity airlines and postal services It compares across four
 countries that represent different varieties of capitalism namely Britain France Germany and Italy over the period between
 1965 and 2005 Thus it combines cross national historical and cross sectoral comparisons The author distinguishes
 technological and economic forms of internationalisation from policy forms notably decisions in powerful overseas nations
 and supranational regulation He argues that contrary to expectations the first was met with institutional inertia In contrast
 policy forms of internationalisation namely reforms in the US and European Union regulation played significant roles in

undermining long standing national institutions The book explores the mechanisms whereby policy forms of internationalisation were influential by looking at the strategies coalitions and resources of key actors in national arenas It also shows that institutional outcomes were surprising all four countries albeit through different routes adopted increasingly similar reforms of economic institutions privatisation the ending of monopolies and delegation to independent regulatory agencies The book rejects the view that technological and economic forms of internationalisation drive institutional change It suggests that policy forms of internationalisation are more important because they become part of domestic decision making and aid the reform of well established national institutions Education Nouvelle Et Sciences de L'éducation Bernard

Research on gated communities is moving away from the hard concept of a gated community to the more fluid one of urban gating. The latter allows communities to be viewed through a new lens of soft boundaries, modern communication and networks of influence. The book, written by an international team of experts, builds on the research of Bagaeen and Uduku's previous edited publication *Gated Communities* (Routledge 2010) and relates recent events to trends in urban research, showing how the discussion has moved from privatised to newly collectivised spaces which have been the focal point for events such as the Occupy London movement and the Arab Spring. Communities are now more mobilised and connected than ever, and *Beyond Gated Communities* shows how neighbourhoods can become part of a global network beyond their own gates. With chapters on Australia, Canada, Europe, South America, Asia, Africa and the Middle East, this is a truly international resource for scholars and students of urban studies interested in this dynamic growing area of research.
