Accounting in France (RLE Accounting) Yannick Lemarchand, Robert Parker, 2014-04-03. This volume illustrates the research not only of French accountants Colasse, Durand, Jouanique, Lemarchand, Nikitin, Richard, Tessier but also the work of Belgian authors writing in French Stevelinck, Haulotte and of French non accountants de Swarte, Durdilly, Sauvy. The work of British and North American academics writing in English on French accounting history is also illustrated from the 1930s Howard Edwards through to the 1960s Parker and the more recent research of Standish, Fortin and Bhimani. The contributions to this volume have been arranged both chronologically and thematically as follows: the earliest business accounting records; the first French accounting authors Colbert, Savbary and the Ordonnance de Commerce; the eighteenth and nineteenth centuries; cost accounting; the national accounting plan; national income accounting; government accounting; and accounting theory. An abstract of each contribution is given in both English and French.

The Tour de France Christopher S. Thompson, 2006-07-17. In this highly original history of the world's most famous bicycle race, Christopher S. Thompson mining previously neglected sources and writing with infectious enthusiasm for his subject, tells the compelling story of the Tour de France from its creation in 1903 to the present. Weaving the words of racers, politicians, Tour organizers and a host of other commentators together with a wide-ranging analysis of the culture surrounding the event including posters, songs, novels, films and media coverage, Thompson links the history of the Tour to key moments and themes in French history. He argues persuasively that this hugely popular sporting event has been instrumental in French attempts to grapple with the great challenges they have confronted during their tumultuous twentieth century: from World Wars, political divisions and class conflict to economic modernization, women's emancipation and threats to public health. Examining the enduring popularity of Tour racers, Thompson explores how their public images have changed over the past century. He concludes with a discussion of the longstanding practice of doping and considers the complex case of the seven-time champion Lance Armstrong.
