Marketing Creativity Selling Heritage Legacy In New Zealand:

Collective Creativity Katherine Giuffre, 2016-05-23 Collective Creativity offers an analysis of the explosion of artistic creativity currently taking place on the South Pacific island of Rarotonga. By exploring the construction of this art world through the ways in which creativity and innovation are linked to social structures and social networks, this book investigates the social aspects of making fine art in order to present a collective theory of creativity. With a close examination of tourism galleries and of course the artists themselves, Katherine Giuffre presents a detailed picture of a complex and multi-faceted community through the words of the art world participants themselves. Theoretically sophisticated yet grounded with rich empirical data, this book will appeal not only to anthropologists with an interest in the South Pacific but also to scholars concerned with questions of ethnicity, creativity, globalization and network analysis. *Heritage Tourism Destinations* Maria D Alvarez, Atila Yuksel, Frank Go, 2016-05-27 Heritage tourism is tied to myth making and stories, creative content that can be shared, stored, combined and manipulated but that depends on a unique cultural or natural history. A significant section of the wider phenomenon that is cultural tourism, heritage tourism is a demand-driven industry that continues to be a subject of heated debate in academic circles. Beginning with an overview of the subject, this book considers the conservation and revitalization of heritage destinations as well as the role local communities have in supporting an attraction. It then discusses product development and communication around the world using new techniques such as social media and examples from food tourism and sporting events, before a final section reviews the planning and institutionalisation of heritage spaces. A timely conclusion subsequently considers the implications of developments such as globalisation, technological improvement and climate change upon these unique destinations. A valuable addition to the literature, this book is the first to bridge the gap between theory and practice, including the latest research and international case studies for researchers and practitioners in tourism and destination management.

Architectural Conservation in Australia, New Zealand and the Pacific Islands John Stubbs, William Chapman, Julia Gatley, Ross King, 2023-12-22 The fourth in a series that documents architectural conservation in different parts of the world, *Architectural Conservation in Australia, New Zealand and the Pacific Islands: National Experiences and Practice* addresses cultural heritage protection in a region which comprises one third of the Earth's surface. In response to local needs, Australia, New Zealand and the Pacific Islands have developed some of the most important and influential techniques, legislation, doctrine and theories in cultural heritage management in the world. The evolution of the heritage protection ethos and contemporary architectural conservation practices in Australia and Oceania are discussed on a national and regional basis using ample illustrations and examples. Accomplishments in architectural conservation are discussed in their national and international contexts with an emphasis on original developments, solutions and contributions made to the overall field. Enriched with essays contributed from fifty-nine specialists and thought leaders in the field, this book contains an extraordinary breadth and depth of research and synthesis on the why's and how's of cultural
