Solutions to Financial Economics Thorsten Hens, Marc Oliver Rieger, 2019-10-25 This book offers a concise introduction to the field of financial economics and presents for the first time recent behavioral finance research findings that help us to understand many puzzles in traditional finance. Tailor made for master's and PhD students, it includes tests and exercises that enable students to keep track of their progress. Parts of the book can also be used at the bachelor level.

Essays in Dynamic General Equilibrium Theory Alessandro Ciarra, John Donaldson, H. Polemarchakis, Paolo Siconolfi, Stephen Spear, 2006-01-11 In the area of dynamic economics, David Cass's work has spawned a number of important lines of research, including the study of dynamic general equilibrium theory, the concept of sunspot equilibria, and general equilibrium theory when markets are incomplete. Based on these contributions, this volume contains new developments in the field, written by Cass's students and co-authors.

Instructor's Manual for Money: Theory and Practice Jin Cao, Gerhard Illing, 2019-12-09 This instructor's manual complements the textbook *Money Theory and Practice*, which provides an introduction to modern monetary economics for advanced undergraduates, highlighting the lessons learned from the recent financial crisis. The manual provides teachers with exercises and examples that reflect both the core New Keynesian model and recent advances, taking into account financial frictions and discussing recent research on an intuitive level based on simple static and two-period models.

Competitive Electricity Markets Fereidoon Sioshansi, 2011-10-10 After 2 decades, policymakers and regulators agree that electricity market reform, liberalization, and privatization remains partly art. Moreover, the international experience suggests that in nearly all cases, initial market reform leads to unintended consequences or introduces new risks which must be addressed in subsequent reform of the reforms. *Competitive Electricity Markets* describes the evolution of the market reform process, including a number of challenging issues such as infrastructure investment, resource adequacy, capacity, and demand participation, market power, distributed generation, renewable energy, and global climate change. Sequel to *Electricity Market Reform: An International Perspective* in the same series, published in 2006, Contributions from renowned scholars and practitioners on significant electricity market design and implementation issues. Covers timely topics on the evolution of electricity market liberalization worldwide.
