Motivating Persistence in the Face of Failure Catherine Chi Chase, 2011 Failure often presents a valuable learning opportunity however students may need motivational scaffolds to protect them from the negative psychological ramifications of failure This work explored the effectiveness of a motivation based intervention called an ego protective buffer EPB that was designed to enhance persistence after failure An ego protective buffer EPB maintains a stable sense of competence by lessening the impact of failure on one s psyche The specific instantiation of an EPB tested here was designed to elicit a combination of internal and external attributions for failure External attributions protect one s sense of competence by averting the blame for failure away from the self while internal attributions encourage students to take some responsibility for remedying the failure situation Based on this theory we embedded an EPB into the rule structure of a computer based genetics game and unleashed it on 143 seventh graders In the EPB condition students were told that winning in the game was a probabilistic outcome dependent on a combination of chance and skill on the part of the students In the Control condition students were told that winning in the game was a deterministic outcome dependent on students skill only Students played the game during two class periods Measures include pre and posttests motivational survey measures and in game behaviors The EPB did have an effect on learning but only amongst high failing students High failing EPB students learned just as much as their low failing counterparts This was not so in the Control condition where high failing students learned far less than their low failing counterparts So the high failing EPB group was behaving as if they were buffered from the effects of failure We also found evidence of a possible mechanism behind this learning effect In the high failing EPB condition students were equally likely to persist after success and failure

while in the Control condition students were far more likely to persist after success exhibiting risk averse behaviors This difference was more exaggerated in a within subjects comparison contrasting the same individuals in situations of high and low failure Finally persistence after failure was associated with learning across the full sample of subjects Regardless of condition or failure rate students who persisted more after failure also learned more This study together with the author's related body of work provides compelling evidence that an EPB is a viable intervention for encouraging persistence in the face of failure

Mathematical Problems in Meteorological Modelling András Bátkai, Petra Csomós, István Faragó, András Horányi, Gabriella Szépszó, 2016-11-08 This book deals with mathematical problems arising in the context of meteorological modelling It gathers and presents some of the most interesting and important issues from the interaction of mathematics and meteorology It is unique in that it features contributions on topics like data assimilation ensemble prediction numerical methods and transport modelling from both mathematical and meteorological perspectives The derivation and solution of all kinds of numerical prediction models require the application of results from various mathematical fields The present volume is divided into three parts moving from mathematical and numerical problems through air quality modelling to advanced applications in data assimilation and probabilistic forecasting The book arose from the workshop Mathematical Problems in Meteorological Modelling held in Budapest in May 2014 and organized by the ECMI Special Interest Group on Numerical Weather Prediction Its main objective is to highlight the beauty of the development fields discussed to demonstrate their mathematical complexity and more importantly to encourage mathematicians to contribute to the further success of such practical applications as weather forecasting and climate change projections

Written by leading experts in the field the book provides an attractive and diverse introduction to areas in which mathematicians and modellers from the meteorological community can cooperate and help each other solve the problems that operational weather centres face now and in the near future Readers engaged in meteorological research will become more familiar with the corresponding mathematical background while mathematicians working in numerical analysis partial differential equations or stochastic analysis will be introduced to further application fields of their research area and will find stimulation and motivation for their future research work *Introduction to Neuro - Developmental Disabilities - II* Mr. Rohit Manglik, 2024-05-24 Introduces the classification early diagnosis and intervention strategies for common neurodevelopmental disorders in children **Math Quest-TM** Deepti Jain, Nanita Chopra, Kalpana Gairola, S Purkayastha, A series in Mathematics The ebook version does not contain CD *Heat* Jayne Blue, 2016-07-20 A scorching romantic suspense novel Detective Mitch Gates is sworn to protect the one woman he can't have Mitch When my best friend and brother in blue was killed in the line of duty I swore an oath to protect the woman he meant to marry Stella She was never mine but I've loved her since the day I met her Now she's back Targeted by a dangerous crime syndicate I have to keep her close to keep her safe Ten years haven't dulled the passion I feel for her or my guilt at knowing how badly I still want to act on it Now her life is on the line Stella Mitch made me feel whole again after everything fell apart He was also the only man I knew I couldn't want His code of honor and my fear of losing him too made us turn away from the growing heat between us I thought time would heal old wounds I was so wrong I never wanted to need Mitch again but I have no choice Only he can help me stop the monster who stole my identity and framed me for a crime I didn't commit But fighting back just might bring me into the arms of the one man I've tried so hard to forget Author's Note Each book in the Tortured Heroes series is a full length standalone romantic suspense novel They can be read in any order and DO NOT contain cliffhangers They DO contain dark themes and elements Approx 65 000 words in length Book Themes romantic suspense men in uniform romance crime organized crime thriller strong female protagonist alpha heroes men in blue identity theft hacker **Modern Mathematics for the Engineer: First Series** Edwin F.
