**Fire Retardant Materials** A. Richard Horrocks, D. Price, 2001-02-16 This is a comprehensive source of information on all aspects of fire retardancy. Particular emphasis is placed on the burning behaviour and flame retarding properties of polymeric materials and textiles. It covers combustion, flame retardants, smoke and toxic products generally and then goes on to concentrate on some more material specific aspects of combustion in relation to textiles, composites and bulk polymers. Developments in all areas of fire retardant materials are covered including research in new areas such as nanocomposites. Fire retardant materials is an essential reference source for all those working with researching into or designing new fire retardant materials. Detailed analysis of the burning behaviour and flame retarding properties of polymers, composites and textiles. Covers smoke and toxic gas generation. Analysis of material performance in fire. *Multiscale Modeling and Simulation of Shock Wave-Induced Failure in Materials Science* Martin Oliver Steinhauser, 2018-02-24 Martin Oliver Steinhauser deals with several aspects of multiscale materials modeling and simulation in applied materials research and fundamental science. He covers various multiscale modeling approaches for high performance ceramics, biological bilayer membranes, semi-flexible polymers and human cancer cells. He demonstrates that the physics of shock waves, i.e. the investigation of material behavior at high strain rates and of material failure, has grown to become an important interdisciplinary field of research on its own. At the same time, progress in computer hardware and software development has boosted new ideas in multiscale modeling and simulation. Hence, bridging the length and time scales in a theoretical, numerical description of materials has become a prime challenge in science and technology. Instruments and Methods for Cyclotron Produced Radioisotopes Saverio Braccini, Francisco Alves, 2020-01-15 The focus of this Special Issue is aimed at enhancing the discussion of Engineering Education particularly related to technological and professional learning. In the 21st century, students face a challenging demand: they are expected to have the best scientific expertise but also highly developed social skills and qualities like teamwork, creativity, communication or leadership. Even though students and teachers are becoming more aware of this necessity, there is still a gap between academic life and the professional world. In this Special Edition Book, the reader can find works tackling interesting topics such as educational resources addressing students' development of competencies, the importance of final year projects linked to professional environments and multicultural or interdisciplinary challenges. **Future Engine and System Technologies** PEP (Professional Engineering Publishers), 1998-03-13 One of the key future challenges facing the automotive industry is the emission proposals in Europe for 2005 together with likely incentives to improve fuel economy.
