**Journal of a Dissenter** Chris Wright, 2025-01-20 This is a lengthy intellectual journal by a political radical that ranges over a variety of subjects such as Marxism capitalism history many schools of modern philosophy psychology economics and contemporary American politics It also includes quite a few personal passages but I've kept those only because they express common experiences and youthful psychological tendencies Its most useful content for students might be its many summaries of good historical and scientific scholarship especially in the journal's second half Ultimately the document is a fairly comprehensive expression of a particular society as refracted through an inquisitive and critical mind from the ages of 15 to 44

that twelve fishermen some of them unlettered from an obscure place in the world called Galilee challenged an empire through self denial and patience and eventually established Christianity He seriously thought that twelve philosophers or intellectuals himself included would do the opposite and crush Christianity Voltaires self appointed cheerleaders such as Diderot Helvetius dHolbach DAlembert Lamettrie and Baron Cloots among others tried to do just that and wrote volumes of work trying to tear down the basis of Christianity and erect an edifice of their own Diderot in particular declared I would sacrifice myself perhaps if I could annihilate forever the notion of God Cloots wrote We shall see the heavenly royalty condemned by the revolutionary tribunal of victorious Reason Lamettrie produced Man A Machine and an entire French encyclopedia was written between 1751 and 1772 by those philosophes because Christianity to a large degree had to go Voltaire would send letters to his disciples and friends saying crasez linfme Rousseau of course was a disciple of Voltaire and declared that Voltaires work inspired me The French Revolution failed Yet like all significant revolutions before and after that period the French Revolution indirectly had a theological root which was then a categorical and metaphysical rejection of Logos That theological substratum has jumped from one era to the next and had and still has historical political economic and spiritual ramifications This book is about the historical and theological struggle of that conflict which had its inception at the foot of the cross

**Myths and Memories** Cindy Lane, 2015-02-27 This book examines the perceptions of European travelling writers about southern Western Australia between 1850 and 1914 Theirs was a narrow vision of space and people in the region shaped by their individual personalities their position in society and the prevailing discourses and ideologies of the age Christian Enlightenment and Romantic philosophies had a major influence on their responses to the land its cultivation and conservation and its aesthetic qualities

and on their views of both indigenous and settler colonial society their class and assumptions of race and ethnicity The travelling men and women perpetuated an idealised view of a colonised landscape and a pioneer community that eliminated class struggle and inequality even though an analysis of their observations suggests otherwise Nevertheless although limited their narratives are invaluable as a reflection of opinions attitudes and knowledge prevalent during an age of imperialism Their perspectives reveal unique viewpoints that differ from those of immigrants who wrote about their hopes and fears in making a new life for themselves These travellers were economically secure literate and educated foundations which provide an insight into the way power and privilege implicit in their writings governed the way they imagined Western Australia in the colonial and immediate post federation period The tinted lenses through which European travelling writers narrowly observed space and people presented a mythical imagined sense of southern Western Australia The Enlightenment Ryan Patrick Hanley, Darrin M. McMahon, 2010 More than any earlier period of European intellectual history the age of Enlightenment infused the republic of letters with social and political significance this long awaited new collection from Routledge brings together in five volumes the very best scholarship on the period and its legacy It also incorporates historical and critical essays addressed to the Enlightenment's alleged responsibility for institutions or policies prevalent in the twentieth century including economic globalization and the Holocaust

Tucker, 2017-09-21 This provocative examination of major controversies in military history enables readers to learn how scholars approach controversial topics and provides a model for students in the study and discussion of other historical events Why did Alexander the Great's empire fall apart so soon after his death How

did France win the Hundred Years War despite England winning its major battles Was slavery the primary cause of the American Civil War Would it have benefited the Allies militarily to have gone to war against Germany in 1938 rather than in 1939 Should women be allowed to serve in combat positions in the U S military All of these questions and many other historical controversies are addressed in this thought provoking reference book By exploring every angle of some of the most contentious debates involving military history this book builds students critical thinking skills by supplying a complete background of the controversial topic to provide context and also by providing multiple perspective essays written by top scholars in the field The perspective essays present arguments for different positions on the controversy Readers will consider the cases for and against whether Hannibal should have marched on Rome after his momentous victory at Cannae whether the United States was justified in using the atomic bomb in Japan whether Adolf Hitler was primarily responsible for the Holocaust and whether torturing prisoners during the War on Terror is warranted among many other historical military debates

**The Trouble with Ownership** Jody Greene, 2011-06-07 Copyright and intellectual property issues are intricately woven into any written work but the precise nature of this relationship has plagued authors printers and booksellers for centuries What does it mean to own the products of our intellectual labors in our own time And what was the meaning three centuries ago when copyright laws were first put into place Jody Greene argues that while owning one s book is critical to the development of modern notions of authorship studies of authorial property rights have in fact lost sight of the most critical valence of owning in early modern England that is owning up to or taking responsibility for one s work Greene puts forth what she calls a paranoid theory of copyright under which literary property rights are a means of state regulation to assign responsibility for printed works to identify one person who will step forward and claim the work in exchange for the right to reap the benefits of the literary marketplace Blending research from legal historical and literary archives and drawing on the troubled authorial careers of figures such as Roger L Estrange Elizabeth Cellier Daniel Defoe John Gay and Alexander Pope *The Trouble with Ownership* looks to the literary culture of early modern England to reveal the intimate relationship between proprietary authorship and authorial liability

Enlightened Colonialism Damien Tricoire, 2017-08-11 This book further qualifies the postcolonial thesis and shows its limits To reach these goals it links text analysis and political history on a global comparative scale Focusing on imperial agents their narratives of progress and their political aims and strategies it asks whether Enlightenment gave birth to a new

colonialism between 1760 and 1820 Has Enlightenment provided the cultural and intellectual origins of modern colonialism For decades historians of political thought philosophy and literature have debated this question On one side many postcolonial authors believe that enlightened rationalism helped delegitimize non European cultures On the other side some historians of ideas and literature are willing to defend at least some eighteenth century philosophers whom they consider to have been anti colonialists Surprisingly enough both sides have focused on literary and philosophical texts but have rarely taken political and social practice into account *Hermeneutics, Authority, and Canon* D. A. Carson, John

Woodbridge, 2005-03-09 Among the many recent discussions of the nature and authority of Scripture I would judge this to be one of the most valuable Particularly in those essays that deal with the actual phenomena of the text of Scripture it displays a level of sophistication and of sympathetic awareness of alternative views that has too often been lacking In contrast to the backs to the wall tone of some conservative defenses of inerrancy these authors write for the most part with the confidence of those who have a coherent and well grounded position to offer The volume will I believe both help to commend Evangelical doctrine to those who suspect it of blind obscurantism and also contribute significantly to mutual understanding among Evangelicals who are too ready to polarize over their different assessments of what it means to honor Scripture as the Word of God R T France Vice Principal London Bible College These thought minded essays are the channel through which conservative scholars must steer for competent interaction with current critical theories for helpful direction in focusing the battle over Scripture and for reflection of conflict areas that Evangelicals must themselves resolve This work rises above the shallow shadow boxing over inerrancy and engages central concerns with academic ability and dignity It puts on the agenda issues that Evangelical leaders must now wrestle Does the Bible contain different kinds of truth Is all divine revelation rational Is the canon really post apostolic No reader will agree with all that is said some will loudly disagree here and there But all students will be stimulated and serious readers edified at the frontiers of current debate Carl F H Henry Lecturer at Large World Visio

**Nature and Norm** Randi Rashkover, 2021-02-02 Nature and Norm Judaism Christianity and the Theopolitical Problem is a book about the encounter between Jewish and Christian thought and the fact value divide that invites the unsettling recognition of the dramatic acosmism that shadows and undermines a considerable number of modern and contemporary Jewish and Christian thought systems By exposing the forced option presented to Jewish and Christian thinkers by the continued appropriation of the fact value divide Nature and Norm motivates Jewish and Christian thinkers to perform an immanent critique of the failure of their thought systems to advance rational theopolitical claims and exercise the authority and freedom to assert their claims as reasonable hypotheses that hold the potential for enacting effective change in our current historical moment The Culture of the Seven Years' War Frans De Bruyn, Shaun Regan, 2014-01-01 The Seven

Years War 1756 1763 was the decisive conflict of the eighteenth century Winston Churchill called it the first world war and the clash which forever changed the course of North American history Yet compared with other momentous conflicts like the

Napoleonic Wars or the First World War the cultural impact of the Seven Years War remains woefully understudied The Culture of the Seven Years War is the first collection of essays to take a broad interdisciplinary and multinational approach to this important global conflict Rather than focusing exclusively on political diplomatic or military issues this collection examines the impact of representation identity and conceptions and experiences of empire With essays by notable scholars that address the war's impact in Europe and the Atlantic world this volume is sure to become essential reading for those interested in the relationship between war culture and the arts
