MASA Revision Guide 2015: Mathematical Studies Mathematical Society of South Australia, 2015-03-27 **Proceedings of the International Joint Conference on Arts and Humanities 2023 (IJCAH 2023)** Ali Mustofa, Ima Widiyanah, Binar K. Prahani, Imami A. T. Rahayu, Moh. Mudzakkir, Cicilia D. M. Putri, 2023-12-18 This is an open access book Welcome to the International Joint Conference on Arts and Humanities 2023 held by State University of Surabaya This joint conference features four international conferences the International Conference on Education Innovation ICEI 2023 the International Conference on Cultural Studies and Applied Linguistics ICCSAL 2023 the International Conference on Research and Academic Community Services ICRACOS 2023 and the International Conference of Social Science and Law ICSSL 2023 It encourages dissemination of ideas in arts and humanity and provides a forum for intellectuals from all over the world to discuss and present their research findings on the research area This conference was held in Surabaya East Java Indonesia on August 26th 2023 September 10th 2023 *Intelligent Systems, Business, and Innovation Research* Rim El Khoury, Nohade Nasrallah, 2024-01-25 Intelligent systems research is a multidisciplinary field that focuses on the development of systems that can perceive reason and act autonomously This can include areas such as machine learning artificial intelligence natural language processing and robotics The goal of intelligent systems research is to develop systems that can understand learn from and adapt to their environment to perform tasks that would typically require human intelligence Business and innovation research is an interdisciplinary field that examines how organizations can create develop and implement new ideas products and services This can include areas such as organizational behaviour strategic management and marketing The goal of business and innovation research is to understand how organizations can foster an environment that encourages creativity and innovation and how they can develop and implement new ideas in a way that leads to success Intelligent Systems Business and Innovation Research is a research area that brings together these two fields to study the use of intelligent systems and technologies in the business context to drive innovation improve operational efficiency and effectiveness of the organization The book aims to understand how intelligent systems can be used in business applications how to design and implement them how to manage the associated challenges and how to leverage them to foster innovation create new business models and gain competitive advantage It offers guidance on how to navigate potential conflicts and challenges that may arise during multidisciplinary research in areas such as Industry 4.0 Internet of Things modern machine learning software agent applications and data science The book focuses on the various fields in which intelligent systems play a critical role in enabling the development of advanced technologies that can perform tasks that would typically require human intelligence For example in smart control systems intelligent algorithms can be used to optimize the performance of machines and devices while in cyber security they can be used to protect networks and data from cyber attacks In bioinformatics intelligent systems can be used to analyse large amounts of biological data while in

virtual reality and robotics they can be used to create realistic and responsive simulations and automatons Additionally the book also highlights the rapidly advancing theoretical foundations of fuzzy sets mathematical logic and non classical logic These are important theoretical frameworks for the development of intelligent systems as they provide the foundation for the representation and manipulation of uncertainty complexity and imprecision These theoretical foundations are essential in the development of intelligent systems that can make decisions and perform tasks in uncertain complex and dynamic environments

Proceedings of the 1st International Conference for Health Research - BRIN (ICHR 2022) Ika Nurlaila,Yunefit Ulfa,Hayani Anastasia,Gurendro Putro,Rika Rachmalina,Rozana Ika Agustiya,Novaria Sari Dewi Panjaitan,Rosantia Sarassari,Anna Lystia Poetranto,Sela Septima Mariya,2023-10-23 This is an open access book The National Research and Innovation Agency Acronymized in Bahasa as BRIN Badan Riset and Inovasi Nasional the Republic of Indonesia was launched in 2021 and has been the only one of Indonesia authorized research institution since The Agency embodies throughout department and non department research bodies in Indonesia and answers and thus responsible directly to the President of Indonesia Despite its juvenile age BRIN is in a tight competition with urgencies of untangling unresolved issues in various aspects in collective life as a nation and a state spanning socioeconomic and culture to medicine and its translational derivatives To function as effectively as expected BRIN has launched 12 research organizations with each is accountable for a specific research field as reflected by the expertise of the pertinent researchers Among those Research Organization for Health was established as an answer to the major challenge of overcoming national burdens which are holistically captured as the roadmaps of SDG s Indonesia where Health stands specially as the top three priority and regarded as Good Health Wellbeing It is clear that what have been produced through long chain of processes in the research chambers must be driven forward and translated accordingly to reach downstream utilizations in such a way that the good health and well being are reachable in any levels As to manifesting these goals into realization knowledge sharing is deemed to be a plausible vehicle This enables disseminations of most current research projects related to health across research institution regionally or globally Therefore we see the need to organize our very first international conference that is further set as one of our annual events with contemporary umbrella themes We welcome researchers scholars and practitioners in health and health related fields to share their insightful research results in our conference The general objective of BRIN s 1st International Conference for Health ICHR is to facilitate dissemination and exchange of most recent progresses made across research institutions and to promote prospectus multi nationals and or multi institutional collaborations to achieve the good health and well being

Clinical Application of Psychiatric Assessment and Treatment in Psychosomatic Diseases Yujun Gao,Xiangjun Tang,Haohao Yan,Jian Xu,Yiding Han,2023-11-08 Psychosomatic diseases are a group of diseases closely related to psychosocial factors but mainly manifested by somatic symptoms involving respiratory digestive endocrine and other systems As a result the lack of consensus on its diagnosis has plagued clinical treatment in internal medicine surgery

and psychiatry for decades In recent years research on the pathogenesis of psychosomatic diseases has made significant progress For example Franz Alexander believes that unresolved subconscious conflicts are the main cause of psychosomatic disorders The subconscious psychological conflict is caused by the changes in the functional activities of the autonomic nervous system acting on the corresponding special organs and patients with susceptible qualities Similarly mental and psychological factors affect gastrointestinal sensory and motor functions through the autonomic nervous system brain gut axis and neuroendocrine system Meanwhile gastrointestinal symptoms also affect emotions and behaviors through the brain gut axis In addition the Cannon Bard theory of emotional physiology and Pavlovian theory of higher neural activity types from quantitative research methods to study the relationship between conscious psychological factors such as emotions and measurable physiological and biochemical changes In clinical work the treatment of psychosomatic diseases has gradually shifted from emphasizing physical treatment to comprehensive treatment principles that is taking into account the psychological and behavioral aspects of the physical treatment of the primary disease The main purpose of physical treatment of the primary disease is to control or relieve symptoms To consolidate the treatment of psychosomatic diseases and reduce the recurrence of psychosomatic diseases combining physical therapy with necessary psychotherapy would potentially obtain a more comprehensive curative effect
