

GET BACK TO THE BASICS

Make sure you and your team have brushed up on the basics of fall protection. Because your life is on the line!

A ANCHORAGE

The anchorage is the secure point of attachment for the fall arrest system. The appropriate type of anchor varies by industry needs and the application. Anchors may be temporary or permanent.

B BODY SUPPORT

Full body harnesses provide a connection point to the fall arrest system. Harnesses are designed to protect workers in the event of a fall by evenly distributing fall forces over your upper thighs, pelvis, chest and shoulders.

C CONNECTING DEVICE

Ties your full body harness to the anchorage point. Commonly used connecting devices include shock absorbing lanyards and self-retracting lifelines (SRL's).

D DESCENT / RESCUE

It is imperative to have a rescue plan in place at your jobsite in the event of a fall. These devices are used to raise or lower a fallen worker to safety. The tools and training for a safe rescue are the last, but most important step in fall protection.
