**Communicating with Our Families** Jill K. Burk, Maryl R. McGinley, Joel S. Ward, 2022-07-12 Communicating with Our Families Continuity Interruption and Transformation examines how communication technologies are shaping childhood parenthood and families by exploring topics such as parental loneliness family storytelling family technology rules mindful technology usage multigenerational communication and community The scholars in this volume work from a human communication perspective and use various research modes of inquiry including quantitative qualitative and interpretive methods Perhaps the most significant question implied by our contributors in this volume is whether the introduction of new communication technologies will fundamentally alter familial forms and if those new groupings that

emerge will resemble what has been generally assumed for several millennia      *Family Communication about Genetics* Clara L. Gaff, Carma L. Bylund, 2010 Genetics is in all senses a family affair The diagnosis of a genetic condition affects not only the patient and biological family members who may themselves be at risk but also family more generally as support may be sought from those considered kin and who may or may not be at risk themselves It is considered best practice in genetic consultations to explore who will be informed within the family when a genetic condition or risk is diagnosed particularly when the health of other family members is at risk There is little guidance or consensus on how to achieve the implicit goal of informed family members while respecting patient confidentiality however There is a need for practitioners to be aware of the dynamics of family communication and to have guidance about how they may sensitively facilitate communication about genetics within families This handbook facilitates the development of clinical practices relating to family communication about genetics Relevant theories of family communication are summarized and related to a clinical genetics milieu and from this frameworks for practitioners are presented A book of this nature is particularly timely as the completion of the Human Genome Project will result in an unprecedented amount of information about genetic constitution and health risks becoming available to individuals and their families The presence of a potentially genetic condition in a family is not a new phenomenon However the growth in testing for genetic conditions common complex conditions and variants that may influence health as well as drug metabolism means that a greater number of individuals will face decisions about communicating this information to their relatives Many health professionals in all levels of health care will be confronted with issues of responsibility and practice in family communication about genetic information as they become providers of this testing

emasculating stereotypes In the US Korean men tend to be viewed as passive non athletic and asexual or hypersexual They are often burdened with very specific expectations that run counter to traditional tropes of US masculinity According to the normative script of masculinity a man is rugged individualistic and powerful the antithesis of the US social construction of Asian American men In an interdisciplinary fashion this book probes the lives of Korean American men through the lenses of religion and sports Though these and other outlets can serve to empower Korean American men to resist historical scripts that limit their performance of masculinity they can also become harmful Mark Chung Hearn utilizes ethnography participant observation and interviews conducted with second generation Korean American men to explore what it means to be an Asian American man today **Family Communication + Mysearchlab Access Code** Kathleen M.
