Tyranny of the Textbook , Tyranny of the Textbook Beverlee Jobrack, 2011-12-23 Educational reforms and standards have been a topic of public debate for decades with the latest go round being the State Common Core Curriculum Standards But time and again those reforms have failed and each set of standards no matter how new and different has had little impact on improving student achievement Why The textbooks Textbooks sell based on design and superficial features not because they are based on the latest research on how children learn and how well they promote student achievement In Tyranny of the Textbook Beverlee Jobrack retired from educational publishing sheds light on why this happens She gives an engaging and fascinating look behind the scenes of how K 12 textbooks are developed written adopted and sold And perhaps most importantly she clearly spells out how the system can change so that reforms and standards have a shot at finally being effective Did you know Reform efforts have focused on writing and rewriting standards and tests but these rarely have any effect on the core curriculum that is published School districts and states don t use effectiveness as a criterion for evaluating and purchasing textbooks Publishers don t offer textbooks with better content or the latest teaching methods because teachers don t want textbooks that require them to change their practices Teachers report that they don t rely on a textbook in their class but research shows that they do Three companies publish 75 percent of the K 12 educational materials Those three companies are producing similar programs with the same instructional strategies none of which require teachers to change their practices significantly Publishers write textbooks for California and Texas All of the other markets have to make do with books only superficially adjusted for their states **Atlanta Independent School System, Atlanta, Georgia, Report on Audit of the Financial Statements for the Fiscal Year Ended ...** ,2008 **Report** Instructional Mandates Task Force (Ill.),2011 **Real World Professional Learning Communities** Daisy Arredondo Rucinski, 2016-12-08 In a professional learning community PLC teachers are organized into teams committed to meeting on a regular basis to study their teaching strategies and the effects of those strategies on the students in their classrooms The teacher teams can be of varied form and composition Whatever the organizational structure the teams have one goal that is to improve teaching so that student learning is improved Policy developers legislators and educational leaders have encouraged the adoption of collaborative professional learning teams as a school reform model for improving schools In this book we describe the results of studies of professional learning communities in real schools and the effects of the teams on student learning Much of the

time school innovations are not examined in depth. Instead authors and developers simply advocate that they be used. In this book school principals and administrators describe how their teachers used the PLC teams to improve student learning in their schools. In other words this book presents actual research on the effects of the use of PLCs rather than testimonials.

Students with Disabilities Can Meet Accountability Standards John O'Connor, 2009-11-15 This book provides a road map for all school leaders as they attempt to improve the achievement of students with disabilities. In today's accountability system school personnel are responsible for ensuring that all groups of students including students with disabilities show sufficient progress. If the disability subgroup fails to meet accountability standards then the school and the district can be labeled as a needs improvement school. This book is designed for principals, assistant principals, general educators and special educators. It focuses on two main goals. First it clearly describes the instructional components that must be implemented across the school to increase the achievement of students with disabilities. Second it describes a step by step process that the school's leadership team must undertake to enable all teachers to provide those instructional components. This book provides a description of what instruction should look like in every classroom across the school for students with disabilities and how to make this happen.

Handbook of Research on Educational Leadership for Equity and Diversity Linda C. Standards-Based Accountability Under No Child Left Behind Laura S. Hamilton,Brian M. Stecher,Julie A. Marsh,Jennifer Sloan McCombs,Abby Robyn,2007-05-24 Since 2001 2002 standards based accountability provisions of the No Child Left Behind Act of 2001 have shaped the work of public school teachers and administrators in the United States This book sheds light on how accountability policies have been translated into actions at the district school and classroom levels in three states

Collision Course Paul Manna,2010-10-12 What happens when federal officials try to accomplish goals that depend on the resources and efforts of state and local governments Focusing on the nation s experience with the No Child Left Behind Act NCLB Manna s engaging case study considers just that question Beyond the administrative challenges NCLB unleashed Collision Course examines the dynamics at work when federal policymakers hold state and local governments accountable for results Ambitions for higher performance collide with governing structures and practices Were the collisions valuable for their potential to transform education policy or has the law inflicted too much damage on state and local

institutions responsible for educating the nation's youth. The results have been both positive and negative. As Manna points to increased capabilities in states and localities, he also looks at expanded bureaucratic requirements. *Collision Course* offers a balanced and in-depth assessment of a policy that has sparked heated debate over a broad expanse of time from NCLB's adoption through its implementation to the Obama administration's attempts to shift away from federalism, the policymaking process, and the complexity of education policy. All get their due in this accessible and analytical supplement. **Student Achievement** Cornelia M. Ashby, 2010-11. The federal government has invested billions of dollars to improve student academic performance, and many teachers and researchers are trying to determine the most effective instructional practices with which to accomplish this. This is a study of strategies used to prepare students to meet state academic achievement standards. This report answered 1. What types of instructional practices are schools and teachers most frequently using to help students achieve state academic standards, and do those instructional practices differ by school characteristics? 2. What is known about how standards-based accountability systems have affected instructional practices? 3. What is known about instructional practices that are effective in improving student achievement? Encyclopedia of Educational Reform and Dissent Thomas C. Hunt, 2010-01-20. The history of American education is replete with educational reform, and to a lesser extent, educational dissent. Consider the present: you have various forms of privatization, school choice, the No Child Left Behind act, home schooling, value-added accountability, alternative teacher preparation programs, on-line instruction, etc. This range of activity is not exceptional. For instance, consider the past: progressive education, open education, the junior high school, the middle school, Life Adjustment education, career education, vocational education, the comprehensive high school, school-to-work, year-round schooling, behavioral objectives, proficiency exams, high-stakes testing, whole language, learning packages, and self-paced instruction, modular scheduling, site-based management, all presented as the way to reform American schools, at least in part. Then you have the reformers themselves, such as John Dewey, George Counts, Herbert Kohl, John Holt, Charles Silberman, Admiral Hyman Rickover, James Bryant Conant, all the way back to Horace Mann himself. Dissenters and dissenting movements, while not as numerous and certainly not as well known in educational circles, count the various faith-based schools and individuals, such as Archbishop Hughes of New York. Clearly, this is an area rich in ideas, rife with controversy, and vital in its outcome for individuals and the nation as a whole. And yet, strangely enough, there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars, teachers, school administrators, and students studying to enter the educational profession. This two-volume work is intended to be that authoritative resource. Key themes and topics include biographies of reformers and dissenters, theoretical and ideological perspectives, key programs and legislation, judicial verdicts impacting educational change in America, the politics and processes of educational reform, and policy making, dissent, and resistance to reform, technology's impact on educational reform. A Reader's Guide in the front matter groups entries around such themes to help readers find related entries more easily. **Hearing their Voices** Kay
