Grandmothering Kathleen Stassen Berger, 2019-11-04 Contemporary grandmothers are often

marginalized from extended family life because social institutions and grandmothers themselves do not understand that they could be vital for working parents for overactive children for suicidal youth indeed for many of the problems of modern grandchildren The genetics and hormones of older women have designed them to be vital family members with patience and perspective that come with age and experience In addition biology helps directly via menopause The grandmother hypothesis explains that human women unlike almost any other living creature experience decades of life after menopause in order to make grandmothers available to their descendants Here Kathleen Berger explores the role of grandmothers in the lives of their grandchildren She uses real life examples to illustrate how grandmothers can best integrate themselves into the lives of their children's families without overstepping She explores the particular needs of each stage of childhood as they relate to grandmother involvement and input Before a child is born grandmothers need to attend to building a strong relationship with the future parents In infancy attachment and feeding are crucial In early childhood grandmothers need to follow the parent's lead remembering that a parental alliance is essential In childhood children need to be safe but not isolated and both bullies and victims benefit from a grandmother's support and assistance In adolescence and emerging adulthood grandmothers need to build direct connections and not avoid the difficult topics of sex drugs death disease and money Throughout elders need to learn technology insuring that it fosters not impedes relationships Problems in relationships are explained honestly and with insight Among these are issues when three generations share a home when parents get divorced and when grandchildren rebel against parental authority Throughout the work both the joy and the complications of effective grandmothering are described Whether you're a biological grandmother a trusted step grandmother or just a warm and trusted older woman with young ones in your life you can be a vital force in the lives of future generations
