Secondary Textbook Review ,1988 This book is intended as a resource for teachers and curriculum developers who select textbooks for secondary English courses It includes a compilation of 32 factual textbook reviews obtained from the application of a review instrument which was based on the California Model Curriculum Standards Grades Nine through Twelve English Language Arts and the English Language Arts Framework for California Public Schools Kindergarten through Grade Twelve The instrument described in the book was applied to selected English composition grammar and reading literature textbooks The book suggests that the resulting reviews can be used by teachers as a screening device to reduce the number of books they review and pilot studies they conduct thus educators will have more time to do in depth reviews of two or three textbooks which appear to match their course requirements and their students academic needs The book also states that the review instrument can be adapted by districts to reflect their own English objectives and test results Every review in the book includes two parts and a publisher s description which appears in the Appendix a section which depicts the extent to which the emphasis on content and process is given to each of the topics in the textbooks reviewed and a section which includes topics on content and processes which might be found only in teachers editions The book does not make assessments regarding the quality of the books reviewed but rather provides information which teachers may find useful in making quality judgments and selecting specific textbooks for English programs SR

Development of Orthographic Knowledge and the Foundations of Literacy Shane Templeton, Donald R. Bear, 2013-07-04 This volume unites spelling and word recognition two areas that have largely remained theoretically and empirically distinct Despite considerable advances in the investigation of processes underlying word perception and the acknowledgement of the seminal importance of lexical access in the reading and writing processes to date the development and functioning of orthographic knowledge across both encoding and decoding contexts has rarely been explored The book begins to fill this void by offering a coherent and unified articulation of the perceptual linguistic and cognitive features that characterize an individual s advancing word orthographic knowledge providing evidence for a common knowledge base underlying spelling in writing and word recognition in reading From a developmental perspective the studies and syntheses presented in this volume blend insights from psychology and language study with those from clinical and classroom observations These insights help explain how individuals from preschool through adolescence develop knowledge of the orthographic system underlying word structure in English and how they apply this knowledge in actual writing and reading contexts Implications are drawn for the assessment and teaching of spelling vocabulary and word analysis from primary through middle grades
